Senator Scott tours area farm

By Melissa Piper

LANCASTER - The Honorable Hugh Scott, Republican minority leader and Pa. Senator, visited here last Friday afternoon (Oct. 17) as the guest of the Lancaster County Farmer's Association.

Admist a downpour, Senator Scott, arrived at the Noah Wenger farm near Stevens, for an informal press conference and tour of the farm. The Senator was on hand to address the farmer's association at their annual meeting and banquet held in Intercourse that evening.

Shortly before the press conference convened, Noah Wenger, presented the Senator with several dozen of eggs representing the agricultural industry in the county. Mrs. Scott, who accompanied her husband on the trip, was presented with a bouquet of red roses to symbolize her trip to Lancaster, "the red rose city."

Scott explained that he was happy to return to the Lancaster County area as he

State Grangers come to Lancaster

By Dieter Krieg

LANCASTER — Grangers from all over the state will be meeting in the Red Rose City, beginning Monday, to hold their annual convention. It is only the third time in the history of the Grange that Lancaster was chosen for the affair.

The four-day sessions are being hosted by the Lancaster, Delaware, Chester, and Montgomery County Pomona Granges with Richard Maule of Quarryville serving as chairman of the convention committee. Daytime sessions are to be held in the Fulton Opera House, while evening programs are slated

Poultry referendum okay urged

By Dieter Krieg

HERSHEY — Poultry producers from 14 northeastern states who took part in the three-day NEPPCO (Northeast Poultry Producers Council) convention here this week received just what organizers of the event said they would.

Held at the spacious and luxurious Hershey Convention Center, poultry producers were treated to an exposition of the latest products and services available to the industry, as well as informative speeches by nationally - known agricultural leaders.

Dr. Cecil E. Howes, president of the Council for Agricultural Science and Technology (CAST) and Agricultural Liaison Officer, Virginia Polytechnic Institute and State University, told the group during closing ceremonies on Thursday:

"We can't become negative in our thinking - we have opportunities before us,

Youth captures ag award

By Melissa Piper

While many youths across the country have earned their American Farming Degrees by displaying outstanding agricultural production, one area youth has captured the award for his outstanding work experience.

Gary Stauffer, son of Mr. and Mrs. Eli B. Stuaffer, New Holland R1, was recently named as the recipient of the top FFA award in the organization - the American Farming Degree.

The youth graduated from Garden Spot High School in 1972 and has been working, since that time, at MM

Local Grain

Thursday, Oct. 23

These prices are made up of the average prices quoted by a number of participating local feed and grain concerns. It should be noted, however, that not every dealer or broker handles each commodity. All prices are per bushel except ear corn which is per ton.

The average local grain prices quoted Thursday, Oct. 23, 1975 are as follows:

	Buy+	Sell+
Ear Corn		
Old	70.00	78.00
New	48.00	55.00
Shelled Corn	2.56	2.87½
Barley	1.81	1.96
Oats		
Local	1.42	1.64
Western	1.67	1.89½
Wheat		
Millers	3.19	3.44
Feed	2.25	
Soybeans	4.42	

+Buy is the price the dealer will buy from the farmer delivered to the mill. Sell is the price the dealer will sell for at his mill.

Local Livestock Market, Auction News

Peoria Auction

CATTLE: Receipts this week 4450; last week 4320; last year 3887.

Slaughter Steers and Heifers largely steady to firm compared with sales the middle of last week. Trading at mid-week was a forced affair. Moderate numbers as the meat trade moved lower in a poor demand situation and buying interests had lower ideas, however, the supply of steers and heifers on Wednesday were moved at steady to slightly high prices with the most noticeable strength on under 1100 lb. steers. Cows steady to instances 50 lower and bulls steady. Receipts about 65 pct. steers, 25 pct. heifers and balance cows.

SLAUGHTER STEERS: Few loads and part loads mixed Choice and Prime 1155-1368 lbs. Yield Grade 3-5, mostly Yield Grade 3-4, 50.50-51.50. Part load 1000 lbs. at 47.00. Choice 1050-1300 lbs. Yield Grade 2-4, 46.75-49.00; 900-1050 lbs. 46.00-47.00, few Wednesday 950-1050 lbs. 47.00-48.00. Mixed Good and Choice 900-1200 lbs. 44.00-46.75. Good 37.00-44.50. Few Good 1150-1200 lb. Holsteins 40.00-42.00.

Carlisle Auction

Carlisle, Pa.
Oct. 21, 1975

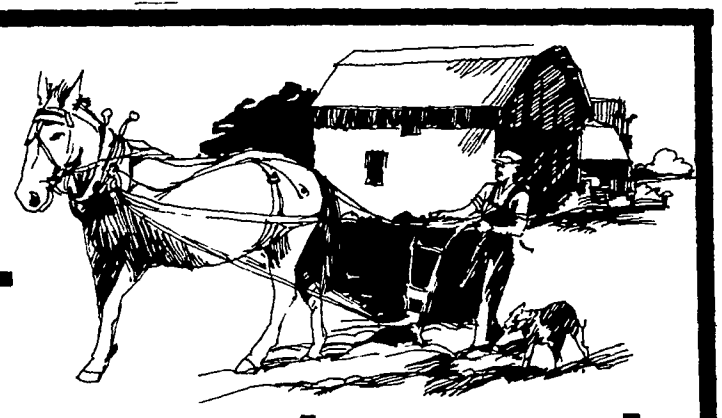
The M-M-MOO-ORVELOUS Feeds that help your herd produce M-M-MOO-ORE.

From Soil to Grain...



We've come a long way! And Mix-Mill has helped.

Here's how mix-mill can help you:

A Mix-Mill "Feed Factory" is ideal for any size operation, whether you prepare two tons of feed per week or 100 tons or more per day. Mix-Mill has a system to fit your needs.

Our systems are versatile. You can start small and expand as you grow. Choose from a wide variety of "Feed Factory" capacities. Standard sizes are 12, 25, 40, 150, and 400 tons. We'll make up most everything in-between too.

Mix-Mill. . .making feed any other way is old-fashioned!

THE OLD FARMER'S ALMANAC

OCT. 27-NOV. 2, 1975

Drip, drip, plenty of precip.

Better mend your broken windows now Rita Hayworth born Oct 27, 1918 Last quarter of moon Oct 27 Veterans Day Oct 27 Average length of days for the week, 10 hours, 26 minutes Most small animals in hibernation now First experimental "Flying Fortress" (XB-17) crashed Oct 30, 1935 Statue of Liberty unveiled Oct 28, 1886 Five inches of snow fell on Georgia mountains Oct 28, 1973 Neglect of agriculture causes most of the world's ills

Old Farmer's Riddle: How can you make a skirt last? (Answer below.)

Ask the Old Farmer: Aren't a spider and a skillet both frying pans? I say yes, my friend no. Who's right? Danville, Ill.

You are. Both are frying pans, the spider being larger than the skillet. Originally, frying pans were designed for use in a fireplace, and had long legs, like a 'spider.' Skillet, we think, is a distorted form of "skellat," which was a sort of handbell or rattle.

Home Hints: Rub a brush type hair roller lightly over window screens and see how it easily picks up lint and dust. **Riddle answer:** Make the blouse first.

OLD FARMER'S WEATHER FORECASTS

New England: Most of week fair with normal temperatures, except for scattered showers in north.

Greater New York-New Jersey: Generally clear and cool all week, becoming warmer by week's end.

Middle Atlantic Coastal: Rain ends beginning of week, then general clearing and mild.

Piedmont & Southeast Coastal: Entire week is clear and quite cool over the region.

Florida: Generally clear and very warm in central and north, partly sunny with occasional rain in south.

Upstate & Western N.Y.-Toronto & Montreal: Thundershowers to start, then clear and cool.

Greater Ohio Valley: Weather is generally clear and cool throughout the week.

Deep South: First part of week is mostly clear, then thundershowers latter part, subsiding somewhat by week's end.

Chicago & Southern Great Lakes: Sunny skies and above-normal temperatures continue throughout the week.

Northern Great Plains-Great Lakes: Early week milder, with some clouds in the west, snow latter part.

Central Great Plains: Variable cloudiness and mild temperatures at first, then moderate to heavy rain in central latter part.

Texas-Oklahoma: Week begins clear and warm, thunderstorms latter part, with moderately heavy rain on the Gulf.

Rocky Mountain: Intermittent rain in north and steady showers in central early part of week, clear and mild latter part.

Southwest Desert: First clear and warm, then becoming cloudy, with showers in the east, showers in the west by week's end.

Pacific Northwest: Mostly cloudy and rainy all week, heavy in the south and moderately heavy in the north.

California: North is generally sunny and pleasant all week; south is partially overcast.

State Joins 500,000 Club

Pennsylvania has become the third state in the nation, following New York and California, to join the National Rifle Association's 500,000 Club by training over half a million persons in its hunter education program.

The Pennsylvania Game Commission's hunter education program had about 150,000 graduates while being presented on a voluntary basis prior to 1969. In 1969, it became mandotory for all first-time hunters under the age of 16 to complete a hunter education course before being eligible to purchase a hunting license.

In the past six years, about 350,000 youngsters have completed the course in Pennsylvania.

THANK YOU

Oct. 21, 1974, I started my first change of employment in 13 years. I had reservations about the change. These reservations were quickly lost as I met and dealt with some of the finest business people I have ever met.

Starting my second year in the area is done with no reservations. With less left hand turns on right hand roads to find some of your places, I'm sure I will meet and deal with more fine people and continue the relationships started during 1975.

Farmers Made Sport Of Their Work, Life

Life and work on farms before and after the Revolution was tedious, time-consuming and often back-breaking

To relieve the monotony of this labor, early farmers often made sport of their tasks, particularly at harvest time

Even into the mid-1800's, cradling was still the general method of grain harvesting A skilled cradler averaged about 2 to 2½ acres a day But a champion Pennsylvania cradler was put to the test From sunup to sunset one day, he cradled 12½ acres, harvesting 1 380 sheaves of wheat When flailed, it yielded 262 bushels of grain The one man kept four other men busy binding the sheaves behind him

Some large farmers used horses to thresh grain On one farm, 24 horses were hitched in four spans of six each and were trotted over wheat sheaves in a circle 400 feet in circumference A total of 416 bushels of wheat were so threshed in a single day It seems the threshing overseer had a bet with a neighboring farmer

Sickles were used in the 1700's to cut wheat Upwards of 100 people might be found working in a single field One day, 20 acres of wheat were cut and sheaved by noon

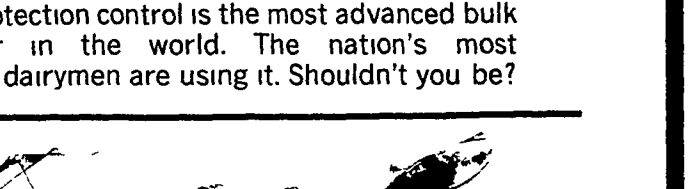
Rum or 'schnaps" — pure rye whiskey — was served as refreshment throughout a harvesting day One farmer accustomed to the tradition made a bet in a Philadelphia tavern that he could drink a gallon of Cyder Royall within an hour and a half He did and after exclaiming, "I finished it," fell down and expired

While most early livestock was seriously neglected, a fat cattle craze developed between 1790 and 1830 Animals were force fed year-round with Indian corn meal, ground oats, potatoes, pumpkins and hay just to see how large a specimen could be raised About 1800, one farmer exhibited an ox six feet high weighing more than 3 000 pounds Another had a six-year-old steer weighing 2,387 pounds

After metal plows became perfected, contests were held One noteworthy accomplishment was the "ploughing" of three sixteenths of an acre of herd and timothy sward seven inches deep in 24 minutes

Even the size of family gatherings became somewhat competitive Large families were practical to provide the labor needed on a farm and families of 16 to 18 children were common Some gatherings included 150 children, grandchildren and great grandchildren

One farmer proclaimed his good fortune to have his wife have twins, his cow two calves and his ewe two lambs all in one night in the month of March



The man who built France's famous prison, the Bastille, was the first person confined there

Farm Commentary

By Dieter Krieg

Praise the carpenters

Disasters are destructive, ugly, and bone-chilling Yet, despite their frightening effects, there's something about them which brings out the best in people

Good neighborliness and a strong community spirit rings out loud and clear from time to time when tragedy strikes — whether it's clean-up after a flood, a fire, or a community getting together to pick corn for a family which suffered an accident

A hideous barn fire, such as occurred at the Joseph Boll farm earlier this month, is examplary of the "Good Samaritan spirit" for which rural America and particularly Pennsylvania Dutch Country is famous A

triumphant barn raising took place there this week, which is to the credit of the community and all of the families involved Such acts of friendship and cooperation deserve a tip of the hat and a cheer. Well done, folks!

Don't forget firemen

Not to be forgotten in any tragedy or emergency are the volunteer firemen who risk their lives and well-being in an effort to lessen the losses of disaster victims

A barn fire breaks out and news is made A barn raising takes place and it's more news There are usually some spectacular pictures of the flames and destruction and well deserved praise for the fellows who unite to do the rebuilding But how about the firemen? They too are a part of the community — who routinely battle their neighbors' disasters

Like the volunteer carpenters who erect an entire barn in a day's time, the volunteer firemen do their work without charge. They don't go on strike, they don't even complain. Whether night or day, rain or shine, they jump at the sound of an alarm, trying their best to save lives and property

Surely, the firemen aren't taken for granted, but their valiant efforts often go unheralded. Talk about Good Samaritans and the volunteer fireman serves as a perfect and outstanding example

Pond is important too

Farmers who don't have a pond or stream close to their buildings should give some serious consideration to correct this situation Ponds are more than a site for swimming and ice skating — they're vital for fighting fires

That fact was dramatically pointec out this past week by Mrs Joseph Boll, Lititz R2, whose family lost a barn due to fire "We're so glad we had the pond," she exclaimed, "the firemen were able to save the stable and milking parlor"

More than 2,000 gallons of water per minute were pumped out of the pond for several hours to bring the blaze under control Fighting the fire without water from the pond would have been an impossibility As it was, not only were the milking parlor and lower stable saved, but adjacent buildings were kept from going up in flames

In pursuit of nonsense

As if the nation's food producers don't already have it tough enough to turn a profit — in the face of inflation, high production costs, bad weather, and a buyer's rather than seller's market — farmers are constantly having to live with a bad image problem because some glory-seeking scientist or doctor wants to grab a headline in his trade journal

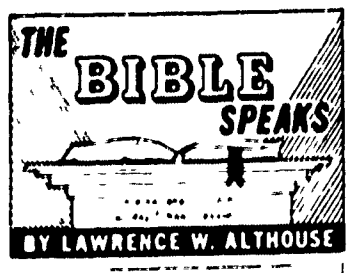
All this talk and research going on about meat, milk, butter and eggs by the so-called experts in the white laboratory coats strikes me as being nothing more than nonsense

Generally speaking, the healthiest people on Earth are farmers They're the same people who can eat a dozen eggs for breakfast, along with a half pound of bacon and a quart of milk According to some doctors and health-food nuts, however, such a diet is practically self-destructive

Magazines are constantly filled with such bad propaganda which has undoubtedly turned many potential customers away from the farmer's products The damage suffered by agriculture because of this uncalled for and often irresponsible kind of publicity is uncalculateable and it will take years of education and research to correct the situation

This unfortunate circumstance — a thorn in every farmer's side — is like a person's character It takes a lifetime to build a good one, but only an hour to have it all go down the drain It's tragic that the farm products which have sustained life since the beginning of time can be blamed for a variety of ailments

Because of this, agricultural marketing organizations are constantly having to be on the defensive to make their products appeal to consumers It shouldn't have to be that way.



THE BIRTHRIGHT

Lesson for October 26, 1975

Background Scripture: Genesis 25: 19-34; 27: 29.

Devotional Reading: Philippians 2: 1-11.

The man who served as my guide in the Holy Land, a Palestinian Arab from Bethlehem, told me that shortly after the Dead Sea scrolls were accidently found in a cave by an Arab shepherd boy, the most important of these, the Book of Isiah, was given to him for a brief period of time. This priceless scroll was unsuspectingly carried around in the back of his car for several weeks before disposing of it as valueless.

Today, he realizes what a valuable treasure he permitted to slip through his fingers. He simply had not appreciated the value of what he held in his hands.

For a mess of pottage

That true story could well serve as a parable for out times. How often people let valuable possessions slip through their fingers simply because they have no idea at all of the value of these things.

This is one of the themes of the story of Jacob and Esau.

It is not one of those "good guys and bad guys" stories. Neither of these men appear admirable as the writer of Genesis portrays them. There is Jacob, crafty, scheming, convetous, and opportunist who gains personal advantage at the expense of someone else's loss.

Yet, neither is Esau very compelling. It was evil of Jacob's birthright, but it was even more monstrously sinful for Esau to sell it. Not only did Esau sell his precious birthright, but he did it without any sense of loss. "I am about to die," he croaks, "of what use is a birthright to me?" (Genesis 25:32). So, as the saying goes: "Esau sold his birthright for a mess of pottage."

Even though he was famished, even though he may have been on the brink of starvation, Esau sold out too cheaply and thus exposed a fatal flaw in his character: he was heedless of his God-given gifts. It is no wonder that the writer of Genesis concluded that "Thus Esau despised his birthright" (Genesis 25: 34).

What have you done to me?

There are lots of people in this world who "despise their birthright." They have no sense at all of the great potentialities that God has placed within them. Like Esau they have a habit of saying: "Of what use is it . . to me?"

There is a strange kind of retribution that dominates the next episode of the story. Jacob flees from his brother's wrath and settles with his uncle Laban in a far land He works to win the hand of his beloved Rachel, the daughter of Uncle Laban.

The big day arrives and the wedding feast begins. The bride is heavily veiled because of tradition. So, it is not until they retire for the evening that he realizes his uncle has put one over on him: the trickster has been tricked!

It might just as well have been Esau who said, "What is this you have done to me?" but it wasn't. Instead, now it was Jacob who was on the bad end of the deal. He was saddled with a woman he didn't want. Even worse, he didn't have the woman he did want. When Laban gives his slimy excuse, Jacob must have shuddered to think that he had once been like that.

Whatever it is that God puts within the lives of each one of us, we must learn to value our Godgiven birthrights, to hold on to them and develop them and use them in his service. For that is why he gave them to us.

NOW IS THE TIME . . .

Max Smith
County Agr. Agent
Telephone 394-6851

To Utilize Corn Fodder

The making of corn stalks into livestock bedding at this time of the year is a very good practice providing we get better weather to dry the stalks. After the corn is picked or shelled, the stalks can be shredded or put through a rota-beater, allowed to dry, and then baled for bedding purposes. Shredded corn stalks have good water absorption qualities and can be used for bedding with all types of livestock; the one exception would be liquid manure systems where it should not be used. In many cases the animals will eat some of the corn leaves for roughage needs. Due to the high price of straw and other bedding materials we urge some attention to shredded corn fodder this fall.

To Avoid Acorns For Dairy Herd

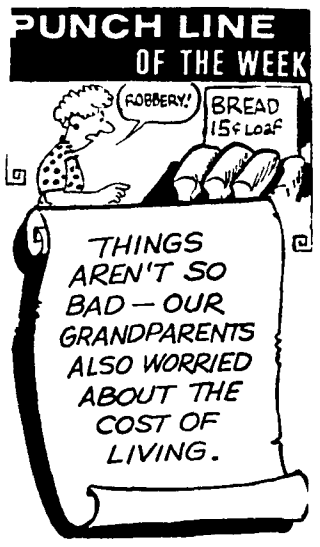
Dairymen should not be grazing their milking cows in pastures with oak trees. There seems to be a very good acorn crop this fall and if the milking cows get started to eat acorns, they will drop in their milk production for the rest of the lactation. In fact, there could be some bloating and digestive troubles if any bovine would eat too many acorns. We suggest special care of the milking herd if grazing in woodlots containing oak trees.

To Protect Milk Quality

Due to adequate moisture on most pasture areas at this time, the growth of forage is going to be very lush and succulant. Also, some dairymen may be grazing the alfalfa or clover fields at this time of the year. All of these forages are very palatable to cattle, but some caution should be used to prevent bloating and to prevent "grassy" flavored milk. The milking herd should be allowed to graze only during the middle of the day and at least 4 hours prior to the next milking. All animals should be allowed to graze legumes (alfalfa and clover) only when the crop is dry and after some feeding of dry matter such as silage or hay. Legumes, and especially wet or frosty legumes, may cause severe bloating.

To Observe Cattle Closely

Newly purchased livestock of all kinds should be segragated from the rest of the herd and watched closely for the first two weeks. Most types of respiratory infections will show up during the first week or ten days. Cattle feeders are especially reminded of the importance of observing their cattle several times each day to look for "slow" cattle and to give them prompt treatment. The "eye of the Master" is still very important in order to reduce losses and to get all animals started quickly. A minimum of stress and excitement is also suggested for the first week.



Farm Calendar

Monday, Oct. 27

Pa. State Grange meeting and convention in Lancaster County. Continues through the 30th.

Tuesday, Oct. 28

Garden Spot Young Farmers will be meeting at 7:45 p.m. in the ag classroom of Garden Spot High School for a discussion on swine finishing houses.

Wednesday, Oct. 29

Dairy Show at the New Holland Sales Stables beginning at 10:00 a.m.

Friday, Oct. 31

Pa. State Poultry Princess contest and banquet to be held at the Embers Restaurant in Carlisle Pike - Rt. 11. Social Hour begins at 6:30 p.m. with dinner at 7:30 p.m.

Monday, Nov. 3

Manheim Young Farmers meeting at the Manheim High School ag classroom 7:30 p.m. - program on preparation and storage of farm equipment.

Wednesday, Nov. 5

Lancaster County Conservation district meeting at the Farm and Home Center 7:30 p.m.

Pa. Young Farmers Convention in Mechanicsburg at the Penn Ram Motor Inn continues through the 6th.

Thursday, Nov. 6

Lancaster County Poultry Association dinner at the Historic Strasburg 6:30 p.m

Lancaster County Holstein Association dinner at the Harvest Drive Restaurant Intercourse.

Hunting tips given

Additional Wildlife From Game Commission

Pennsylvania's hunters are expected to find good populations of game birds during the early part of the regular small game season, but the natural supply will again be supplemented by wildlife released by the Game Commission.

This year 167,000 ringneck pheasants are scheduled to be released on both public and private lands which are open to public hunting.

The pheasant release will be about 3,000 more birds than were stocked last fall. And while the game farms have been able to increase the quantity of birds which will be available for liberation this fall, there has been further upgrading of the quality of the pheasants.

Now that hunters in the northern part of Pennsylvania are permitted to harvest birds of either sex, a fair number of hens will be stocked. This year about 41,000 hen pheasants are scheduled for release in that part of the state where shooting of hens is permitted.

In 1975 the Game Commission reared over 14,600 mallard ducks at its waterfowl farm for release in the wild. In addition, 6,250 turkeys are being liberated prior to the opening of the general small game season, 3,250 from hardening pens and 3,000 directly from the turkey farm.

Funds for the production and distribution of this wildlife come from the sale of hunting licenses.

xxx

Report Tagged, Banded Birds and Animals

Tagged or banded or color-marked birds and animals play a major role in the management of both game and non-game species, and the Pennsylvania Game Commission asks the cooperation of the general public, as well as hunters, in reporting marked wildlife to appropriate agencies, institutions or organizations.

Federal and state agencies, ornithologists, sportsmen's groups, etc., regularly tag or band birds and animals for various studies. For example, the Game Commission this year banded waterfowl and doves; the Canadian Wildlife Service banded and color-marked shorebirds; additional birds were color-marked by the Manomet Bird Observatory, Massachusetts, and the National Museum of Canada on Bathurst Island in the Canadian Artic.

Information gained in such endeavors is a great help in the continuing studies of migration, movements, reproductive success and survival percentages of birds or animals.

Hunters can help assure the future of their sport by reporting the band or tag numbers and location and date of bagging or finding tagged or banded or color-marked wildlife to the organization or agency listed on the tag or band.

If the finder or spotter is uncertain as to what to do, all pertinent information should be given to the Division of Game Management, Pennsylvania Game Commission, P.O. Box 1567, Harrisburg, Pa. 17120.

KEY TO PROFIT
AGRI KING, inc.
PERSONALIZED FEEDING PROGRAMS
FULTON, ILL.

This is the last in a series of six articles. All previous articles in the series ("Why AGRI-KING Builds Rations From the Ground Up", "What is a Balanced Ration", "Is Testing Necessary", "AGRI-KING'S Objective - Should it Be Yours?" and "Dry Cows - Why Bother?") are available on request. Call 717-394-3047.

THEY TELL ME AGRI–KING PRODUCTS ARE TOO HIGH PRICED.

They might appear to be too high to people who don't realize the high potency of the vitamins, trace minerals, enzymes and flavorings that are in the AGRI-KING products. These products are not made only to sell. They are made to supply the animals with the micro nutrients they need to produce their inherited production and also maintain their health. They furnish high levels of vitamins, trace minerals and enzymes - not just a few of them but the whole spectrum of all vitamins, all trace minerals and enzymes.

These products might also appear to be a little high to someone who doesn't know all the service that goes with them. A farmer has the privilege of having an AGRI-KING serviceman work with him in solving his problems and figuring out how to use his home grown feeds to their best advantage. The farmer also has the privilege of talking toll free to AGRI-KING'S nutritional department.

They might also seem too expensive to someone who doesn't realize the money that is wasted in overfeeding or under feeding protein, calcium, phosphorus, vitamins and trace minerals. Each one of these is very important, but not one is more important than the others, and they must be put together in the right amounts and ratios.

The products might also seem too expensive to someone who doesn't realize that profit over feed cost is more important than the cost of a ton of feed. If a ton of feed costs a little more but is in balance with your roughages, your profit over feed cost will be higher than it would be if you buy a real cheap feed that does not match your roughages. You must remember also that the more expensive per ton is not always the most expensive per cow per day. For example it you have a $100 per ton feed and need to feed 20 pounds of it a day, it will cost you $1.00 per cow per day for her grain ration. But on the other hand if you have a ton of feed that costs $400. per ton and you need to feed only 2 pounds a day, this will cost you only 40 cents per cow per day for her grain ration.

They might also seem too expensive to someone who doesn't realize how expensive it is to doctor sick cows and replace 25-40 percent of the milking herd each year.

REMEMBER THIS — The most important figure is what does it cost to produce a pound of milk, not what is the cost of a truckload of feed, a ton of supplement, or a bag of vitamins and minerals.

★★★

Youth captures ag award

Gary Stauffer is shown with his FFA North Atlantic Regional Proficiency Award that he won prior to being named as an American Farming Degree recipient. The son of Mr. and Mrs. Eli B. Stauffer, New Holland R1, Gary is employed by M. M. Weaver.

(Continued from Page 1)

Weaver's a Massey-Ferguson dealership near New Holland.

Gary, who has demonstrated outstanding abilities in mechanical work, is serving the dealership as a sales and service employee. The youth has been responsible for setting up equipment, demonstrating machinery to buyers and even constructing equipment as it comes from the factory.

Gary's work at M. M. Weaver's and also on two dairy farms, helped the young man to be selected for the award, in the work experience catagory.

Gary wasn't sure that he'd won the award until he was notified earlier this month. "I was happy when I received the letter because I knew there were some areas that I hadn't done a lot of work in, but I kept hoping."

During his high school career, Gary served the Grassland FFA Chapter as student advisor and also served as chairman of the earnings and savings committee, which involved quite a lot of attention.

The young man also participated on the parliamentary procedure team, the livestock and poultry judging teams for the chapter.

Gary received the Keystone Farming Degree in 1972 during his senior year and was selected as the North Atlantic Regional Proficiency Winner for work experience the following summer.

Gary also garnered numerous awards for his record books which received several gold medals.

While attending Garden Spot High School, Gary also served on various FFA committees which ranged from citrus sales to planning the annual banquet.

While the youth was pleased that he had been chosen for the award, the honor did not interrupt him from going ahead with his work. Gary recently traveled to Ohio and Canada to pick up machinery for farmers served by Weaver's and has also been busy demonstrating equipment and helping to service the machinery for area farmers.

There's been a lot of talk about the new Individual Retirement Account

When it's finally time to retire, there's a chance your social security check alone won't be enough. So if you're not covered by any pension plan except social security, you should know about our new Individual Retirement Account.

Basically this new account allows you to deposit as much as 15% of your income, up to $1500 per year, into a retirement savings plan. The deposits made during the calendar year are deductible from your gross income. This means a tax savings for you.

EVEN THE EARNINGS ARE TAX-FREE UNTIL YOU RETIRE

We'll help you choose the retirement savings plan best suited for your needs. A plan that will pay the maximum interest permitted by law. And, if you would like to deposit on a regular basis, when the balance in your IRA savings account reaches $500 you may transfer the funds into a Farmers First Certificate of Deposit. This will increase your earnings toward retirement

Remember, the money you put away and the earnings on it won't be taxable until you retire.* And by then, chances are you'll be in a much lower tax-bracket.

To get the facts and see how you can save taxes, talk to your personal banker at Farmers First today.

Grange convention

Continued from Page 1

for the McCaskey High School auditorium. Special youth programs are lined up for Wednesday at the Wickersham School and Lincoln Junior High School.

This is the farm organization's 103rd annual meeting, and as in other years, attention will be focused on major problems facing agriculture and rural communities. According to J. Luther Snyder, State Grange master, more than 2,500 bills, many of them directly or indirectly affecting agriculture, have been introduced to the State Legislature in Harrisburg, and some of them will be studied by the nearly 600 delegates from Granges throughout Pennsylvania. Snyder stresses a need for "balanced legislation" to benefit all citizens of the Commonwealth.

Topics of discussion will cover local, state and national issues. The national viewpoint will be presented Monday afternoon by John W. Scott, master of the National Grange.

Opening its doors at 1:30 p.m., Monday, many of the sessions will be open to the general public, while others will be for members only.

Among the guest speakers scheduled to make an appearance before the more than 2,000 (including young people) persons expected to take part in the convention are Pennsylvania's Secretary of Agriculture, James McHale; Representative Kent D. Shelhamer, chairman of the State House Agriculture Committee; and Senator Patrick J. Stapleton, chairman of the State Senate Agriculture Committee.

Stapleton is scheduled to speak on Monday at 3:50 p.m.; Shelhamer goes to the podium on Tuesday at 10:00 a.m.; and McHale makes his appearance at 11:45 on Tuesday.

A highlight of the convention are the various youth programs scheduled annually by the Grange. Wednesday has been designated as Youth Day when young Grangers participate in a number of activities which will conclude with a party. The Youth Princess (Barbara Harrison from Chester County) and Youth Prince (Fred Rudy from Allegheny County) are to be honored in ceremonies on Monday evening.

While the bulk of the Grange sessions are of a business nature, some time has been set aside for entertainment and socializing. Talent contests are scheduled for both Monday and Tuesday evening, as well as exhibits and judging of handicrafts, paintings, photography, sewing and cooking.

Special recognition will be bestowed on this year's Young Married Couple and the Granger of the Year. Mr. and Mrs. James Steele of Pocopsin, Chester County, owners and operators of a dairy farm, have been chosen as the Young Married Couple; while J. Mitchell Blose, an Armstrong County farmer and educator, is Granger of the Year.

Following is a partial schedule of events for the 103rd annual convention of the Pennsylvania State Grange.

Fulton Opera House
Monday

1:30 p.m. - Open in Sixth Degree; Presentation of Honored Guests; Roll Call of Officers; Lowering to Fourth Degree.
2:30 p.m. - State Master's Address.
3:15 p.m. - Address - John W. Scott, Master of National Grange.
3:50 p.m. - Address - Senator Patrick J. Stapleton - Chairman of the Senate Agriculture Committee.
4:10 p.m. - Partial report of Legislative Committee.

Monday Evening
McCaskey High School

7:30 p.m. - State Grange Talent Contest, Introduction of Youth Prince and Princess and Young Married Couple.

Tuesday
Fulton Opera House

9:00 a.m. - Opening in Fourth Degree.
9:30 a.m. - Memorial Service - Rev. Thomas B. Musser, State Grange Chaplain.
10:00 a.m. - Introduction of Resolutions without debate.
10:05 a.m. - Address - Representative Kent D. Shelhamer, Chairman of Agriculture and Dairy Committee in House of Representatives.
11:00 a.m. - Partial report of Agriculture Committee.
11:30 a.m. - Report of Officers.
11:45 a.m. - Address - Honorable James A. McHale, Pennsylvania Secretary of Agriculture.
2:15 p.m. - Partial Report of Dairy Committee.
2:45 p.m. - Partial Report of Legislative Committee.
3:15 p.m. - B. McClain Cochran, General Secretary of the Pennsylvania Sabbath School Association.
3:25 p.m. - Report of National Session for 1979 — Introduction of General Chairmen for convention.
3:35 p.m. - George Bangs - Columbia Accident and Health Insurance Company.
3:55 p.m. - Report of Junior Grange Director, Annetta Merkel.
4:15 p.m. - Report of State Officers and Committee Reports.

Tuesday evening
McCaskey High School

7:00 p.m. - Finals - Family Vocal Contest; Finals - Family Instrumental Contest; Finals - Pomona Chorus Contest; Introduction of winners in Junior Grange Talent Eliminations; Introduction of Junior Grange Prince and Princess.

Wednesday
Fulton Opera House

9:00 a.m. - Opening in Fourth Degree.
9:40 a.m. - Ruth Hoover - Report of State Director of Women's Activities Comm.
10:00 a.m. - Richard Troendle - Report of Farmers and Traders Life Insurance Co. Recognition of Grange of the Year.
11:15 a.m. - Partial Report of Local Government Committee; 11:35 a.m. - Recognition of Past State Officers; 12:00 noon; Suggestions of names for members of Executive and Finance Committees; 12:05 p.m. - Last call for resolutions without debate.
1:00 p.m. - Youth Ritual and Demonstration Contest - Lincoln Junior High School Pomona and Subordinate Masters Meeting.
4:00 p.m. - Conferral of Junior Degree -

1000 horses at Penn National

One thousand horses took part in this week's Penn National Horse Show in Harrisburg. Riders took their mounts through various exercises in preparation for events which had a total purse of over $45,000 at stake. Proceeds from the eight-day event go to the Harrisburg Kiwanis Club in support of youth programs. The Penn National is the largest indoor sporting event staged in Pennsylvania and one of North America's finest equestrian shows.

By Dieter Krieg

HARRISBURG — During the last several decades, when scores of thousands of farmers left the land, most of the horses went too. Men and horses were replaced by machines to a large degree. The farmers who stayed behind have for the most part evolved into a new breed of agriculturalists who had no choice but to become more productive, more efficient, and more businesslike. And the horses of today are also quite different from their ancestors of generations ago.

What the modern horse is — and what it can do — could be seen this past week at the Pennsylvania National Horse Show which took place at the Farm Show Building. Granted, the high-spirited, graceful animals are a far cry from their rural cousins — some of which are still hard at work on Pennsylvania farms — but they are nevertheless a "branch of a tree" which has its roots in royal horse stables, military academies, and farms.

This year's horse show in Harrisburg drew close to 1,000 horses and 700 riders. Sponsored annually by the Kiwanis Youth Foundation of Harrisburg, the event offered $45,000 in prize money to riders who came from all over the United States and several foreign countries. Proceeds of the event go to the Kiwanis Youth Foundation, with more than $250,000 having gone to that organization in the past 17 years.

The barns, which most readers of Lancaster Farming associate with dairy and beef cattle, sheep, hogs, and heavily muscled Belgian work horses, were completely taken over by the extremely refined, almost fragile Thoroughbreds, and their equally well-bred cousins.

While the horses might not have been groomed any better than the best show cows seen at dairy and beef shows, their exhibitors were. Dressed in immaculate riding attire, owners presented themselves and their mounts with unabashed pride.

The Pennsylvania National Horse Show, which incidentally celebrated its 30th season here last week, is recognized as the largest indoor equestrian event in North America, and ranks as Pennsylvania's largest international sporting event. Known for short as the "Penn National," the event annually attracts such world-famous equestrians as Michele McEvoy, Rodney Jenkins, Tony D'Ambrosio, and Bernie Traurig.

Miss McEvoy, from Lagrangeville, N.Y. won the Pennsylvania Big Jump competition here last year to become the first woman to ever have done so. She is also the runner-up of the world's women championship riders. A $2,000 purse was at stake. This year the opening jumping prize money for the show is $11,000, according to Harry G. Banzhoff, president of the show and the Pennsylvania National Horse Show Association.

Many of the country's top riders appeared at the show, which opened last Saturday and continues through tonight. Among the top equestrians is Rodney Jenkins of Orange, Va. He was last year's leading rider here and recently captured the $30,000 American Gold Cup aboard "Idle Dice" in Philadelphia.

One of the foreign entries in open jumping was Kevin Bacon, from Australia — the first rider from the "Land Down Under" to ever appear in a Penn National.

Another of the show's top features was the "Prix des States," which brings together the leading junior riders from New York, Pennsylvania, Connecticut, New Jersey, Michigan and Tennessee. A $1,000 prize was at stake, with several thousand spectators watching the event in the large arena.

FARM CREDIT SERVICE

IT DOESN'T HAVE TO BE JUST THE TWO OF YOU FACING THE FUTURE.

The needs of your family are never-ending. Equipment. Home appliances. Feed and seed and fertilizer. Doctor bills. College educations. Trucks and tractors. Remodeling the house.

The people at Farm Credit understand farm families and their special needs. After all, they've been working with families like yours for years. They work with you to help you reach your goals. And it's good to know that they believe in constructive credit . . . the kind that helps you get further ahead instead of deeper in debt.

So the two of you don't have to go it alone. Not when there's a Farm Credit man who's a real professional when it comes to helping farm families like yours.

Barn raising held at Joseph Boll farm

The Joseph Boll barn between Manheim and Lititz burned down on October 7. The disaster, which caused six fire companies to rush to the scene while several others were alerted to be on stand-by, completely destroyed the upper portions of the barn.

This past Wednesday, just 15 days after the blaze occurred, neighbors and friends from the Manheim-Lititz areas swarmed to the Boll farm to put up a new structure.

The first volunteer carpenters arrived at 6:30 a.m. and thirty minutes later they were busy with their saws and hammers. The place was buzzing with activity.

By mid-afternoon all but a couple of the roof trusses were in place and metal sheets were being tacked down for roofing and siding.

Close to 150 men worked on the barn, guided by Chris Beiler, a carpenter from Leola, who reportedly built nine barns last year, seven of which were replacements for structures which were lost to fire. While the men hammered, measured, sawed, and trimmed, women of the community provided food and drink. The ladies' Sunday School class from Erb's Mennonite Church was in charge of organizing the food service.

The new barn is not quite as large as the original, being somewhat lower in height and minus the north wing. However, it sits on the same foundation as the original main barn and has the same measurements — 50 by 115 feet.

Work on the barn was still going on Friday, and final completion of such details as electrical wiring is not expected to be done until next week.

Party Planning TIPS

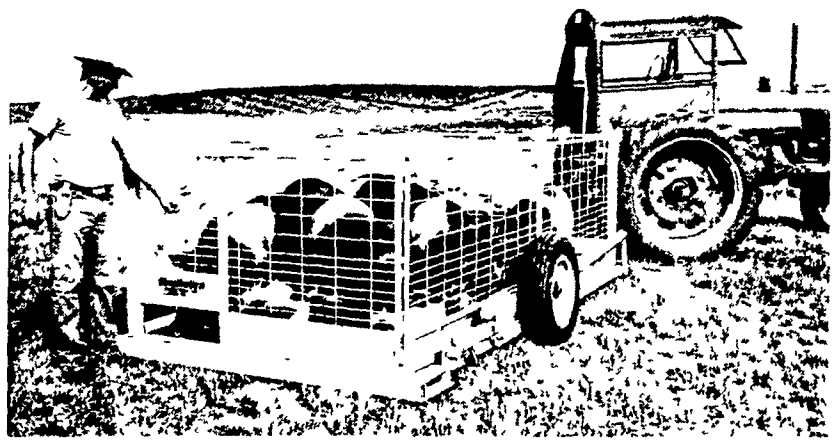
Where can you go for help in planning the big annual social affair of your club or company?

One person who can help you get your ideas together about food, decorations and entertainment, and make sure everything gets done properly and on time is a banquet manager

Party planning expert Klaus Schattleitner, former Holiday Inn Innkeeper of the Year, suggests that one of the most important things to discuss with the banquet manager is the number of people attending Although an approximate number is sufficient for deciding on the room size, closer to the party date the kitchen staff will need a guaranteed number for use in preparing food, whether it's hors d'oeuvres or a full-scale sit down dinner The wrong number can cost you money, though many inns have a 10 percent leeway policy

The right decisions can lead to the best party your organization ever had

WALK—ON
LIVESTOCK TRAILER



★ The handiest way to move livestock or supplies on and around the farm

★ Trailer bed lowers to ground level for loading, levels automatically, raises hydraulically to transport

★ Operates from any standard single or double acting hydraulic system, pulls behind tractor, pick-up or auto

★ Available in 12 and 14-foot lengths 6 ft width with side panels 42 inches high

★ Open panel design provides air movement to keep livestock cool on hot days

★ The entire rack may be easily removed to make a flat bed trailer

Senator Scott tours area farm

(Continued from Page 1)

had made many "farming friends" in the southeastern Pa, community.

Talks to Newsmen

During the press conference, Senator Scott denied reports that he would soon be named as the ambassador to China. The Senator did explain that he had talked to the president about embassadorships but had recommended George Bush for the appointment. "Unless sources know more than I," the Senator stated, he would be taking the position.

When asked if he would be running for office next year, the Senator noted that although the definite decision had not been made, he had set up an office in Erie. He told the newsmen to "wait and see."

Speaking on the failure of some unions to allow grain to be loaded for Rusiia, the Senator, explained that boycotting could only hurt the detents. He also stated that long term agreements for both the European countries and Russia for grains would be the best alternative.

During his remarks at the banquet later in the day, the Senator noted his concern over the natural gas situation for this winter. Naming Pa. as the 6th worse state for shortages, Senator Scott, commented on the concern that this might cause for heating. The Senator recommended lifting price controls and encouraging intrastate trade for the natural material.

Sees Beef Cattle

Although rain hampered the Senator's tour of the Wenger farm, the Republican leader, did visit the barn to view a sampling of the Wenger's beef animals. Posing with the animals and Wenger's daughters for pictures, the Senator remarked about the size of the animals noting that they represented a "lot of meat."

Senator Hugh Scott was the guest of the Lancaster Farmer's Association for a tour of the county last Friday (Oct. 17). Pictured with the Senator following a tour of the Noah Wenger farm in Stevens, is Ivan Yost (left) and Don Hershey (right) officers of the organization.

Noah Wenger (right) Stevens, shows Senator Scott one of the farm's baby beef animals. The Republican minority leader of the Senate, toured the Wenger farm before speaking at a dinner meeting sponsored by the Lancaster County Farmer's Association on Oct. 11.

Directors Elected

Following Senator Scott's address at the farmer's banquet, new directors for the Lancaster County organization were elected. The following members were named to a two year post - Harold Ney, Marietta R1; Ralph Hostetter, Mt. Joy R2; James Shertzer, Millport Rd., Lancaster; Reid Wissler, Ephrata R2; Lester Wiker, Holtwood R2; A. Dale Herr, Kirkwood R1 and Robert Wagner, Quarryville R2.

FFA film sponsored by CIBA-GEIGY

GREENSBORO, N.C. - Again this year as every year since 1972, the Agricultural Division of Ciba-Geigy Corporation is sponsoring the Future Farmers of America Stars film.

The film depicts the farm and business operations of each of the four regional Star American Farmers and Star Agribusinessmen. An additional segment to be filmed at Kansas City during the National FFA Convention will show the selection of the national Star American Farmer and national Star Agribusinessman.

This film is designed for use by vocational agricultural instructors, and others interested in showing the youthful dynamics of American agriculture. It is produced and distributed through a grant to the National FFA Foundation.

The 1975 stars film and those from previous years may be borrowed free of cost by writing Venard Films, Box 1332, Peoria, Illinois 61601.

NEPPCO convention

The lower level of the spacious and luxurious Hershey Convention Center served as the exposition area for manufacturers and businesses who attended the NEPPCO convention this week. The latest in equipment and services were displayed, while informative talks and panel discussions were held in halls and banquet rooms on the upper level. The three-day NEPPCO convention hosted poultry producers from 14 northeastern states.

(Continued from Page 1)

although some of them may take weeks and months. We must not allow others outside of agriculture to make our decisions for us without us being heard."

On a similar note, Hendrik Wentink, chairman of the National Commission on Egg Nutrition (NCEN) and assistant to the president at Pennfield Corporation, urged poultrymen to accept the proposed Egg Research and Promotion Order.

Wentik observed that the upcoming vote (scheduled for next month) will give egg producers an opportunity to underwrite their own future by promoting research, education, and sales. Wentink opinionized that this is a chance for self-improvement which will not come again for several decades. To illustrate his remarks - and favoritism towards the referendum, he cited a graph which depects total U.S. annual per capita egg consumption. (See chart)

According to a brochure prepared by the United Egg Producers, egg consumption has been declining steadily since 1951, and especially since 1971. The average American eats only eight eggs per year, UEP claims, and if this alarming rate of decline continues there won't be any need for eggs by the turn of the century.

The egg research and promotion order now before poultry producers for their consideration would permit the following:

- Advertising through the mass media
- Promotion to reach customers
- Research in market development and new products
- Merchandising tools for eggmen
- More accurate data for better marketing decisions
- Foreign market development
- Coordination of existing programs
- Consumer and producer information programs

Organized in 1931, NEPPCO has been meeting annually to discuss future programs, technological developments, mutual problems, and general as well as specific trends. This year's convention also featured a special ladies' program, and youth activities in which over 50 FFA and 4-H members from nine states took part.

Following are some of the highlights of addresses given by several keynote speakers:

A poultry industry in which nearness to market will assume more importance than other traditional geographic advantages was pictured by speakers at the convention.

The lower labor and construction cost advantages of the Southeast are disappearing, according to Fred Adams, Jr., president of the giant Cal-Maine Foods Inc., headquartered in Jackson, Miss., so that now nearness to market by producers and processers assumes a more important role.

Adams was joined by panelists William Groseclose, vice president, Rockingham National Bank, Harrisonburg, Va., and C.F. Dickson, vice-president, Federal Land Bank, of Baltimore, who viewed poultry capitalization needs of 1980 for those attending the 14-state NEPPCO exposition here at the new Hershey Convention Center.

Adams predicted the demise of many smaller contract growers in the face of the need for facility replacement, low-cost labor availability and static income in the face of rising costs.

"The egg business has not made a profit in five years," he told the group, "while inflated costs have caused working capital requirements to increase each year."

Northeast poultry producers have an important stake in the successful reorganization of the Penn Central and the other bankrupt railroads," Charles B. Shuman, former president of the American Farm Bureau Federation, told the eggmen. Shuman, a farmer from Sullivan, Illinois, is a member of the Board of Directors of the United States Railway Association.

"Congress is now considering the recommendations of the U.S. Railway Association that a new northeast railway system, ConRail, be former from the Penn Central and six other bankrupt lines. While there are many risks, and success is by no means assured, ConRail is the best of the alternatives available," Shuman said.

"Northeast poultry producers are dependent upon railroad transportation for a huge tonnage of feed ingredients and other supplies brought from outside the region. If forced to turn to other modes of transportation, their costs would increase markedly and many poultrymen might be forced out of business. The

Ontelaunee Grange meets

A meeting of the Ontelaunee Grange was held recently with the Master Ray Davis presiding. Mr. and Mrs. Mike Winiarz were admitted as new members.

It was reported that the ladies activities group met recently for a sand painting demonstration.

The young marrieds recently enjoyed a weekend at Edgewater Acres in Alexandria, Pa. with 22 couples present representing 14 counties.

Donald Kauffman and Herbert Heck gave talks on winterizing houses and furnaces during the evening program and a skit was presented by Ruth and Rodney Mease. Skits were also given by Mary Brown, Howard Latshaw, Lynn Kauffman, and Jerry Althouse.

Several committees were appointed for the coming year. The next meeting will be held Oct. 28 and will be a Halloween Party. It will begin at 7:30 p.m.

Liberace to appear at Hershey Park

Supershowman, Liberace, will appear at the Hersheypark Arena, Sunday, November 9 for two shows at 3 p.m and 8 p.m.

Liberace last performed at the Arena on May 2 and 3, 1974, drawing a combined attendance of 12,500 fans and grossing close to $74,000.

Liberace's 1975 Supershow will be coming in direct from a successful Las Vegas engagement. Along with Liberace will be two talented entertainers, thirteen-year-old banjo wizard, Scotty Plummer and a magician with a new kind of magic, "Mr. Electric."

This year Liberace's costumes are super-incredible. The highlight of his wardrobe for this show is a 25-foot cape designed as an exact replica of the coronation robe worn by King George V With one exception, Liberace's cloak is lined with $60,000 worth of chinchilla, rather than ermine like the original. "My costumes have become an expensive joke," comments Liberace. "But as long as my audiences enjoy them, I'll be happy to keep on wearing them."

This all-new Liberace show is full of beautiful colors, costumes, exquisite music, comedy, and most of all, entertainment.

Reserved tickets are available at the Hersheypark Arena box office or at any Hershey ticket agency.

Brown Swiss cows receive high recognition

Registered Brown Swiss cows in the local dairy herd of Buttonwood Farm, Birchrunville, Pa. recently completed outstanding official DHIR production records.

The Brown Swiss Cattle Breeders' Association of America, Beloit, Wisconsin, recognizes all cows on official DHIR test that complete 305 day lactations on 2x milking exceeding 550 lbs. of butterfat as two-year-olds, 600 lbs. as three-year-olds, 650 lbs. as four-year-olds and 700 lbs. at five years of age or older. The cows in the Buttonwood Farm herd recently reaching this outstanding level of production are: Amy Angelo; Fairdell Sun Star Tina; Snelling Beautician Fortune; Meadow Brook Prince's Lady; Pfeffer Valley Louie Aliace; Snelling Chip Jewel; Quaker West Janet Darlene; Empire Royal Lass; Snelling Design Amethyst; Maple Cove Victorious Sandra; Meadow Brook Princes Lorra; Snelling Beautician Marmara.

The weighing and testing of the milk while these DHIR records were being made were under supervision of the local DHIA supervisor and Pa. State University.

THE GOOD WORD from the Bible

Blessed is he that waiteth, and cometh to the thousand three hundred and five and thirty days.

But go thou thy way till the end be: for thou shalt rest, and stand in thy lot at the end of the days.

Daniel 12: 12, 13

NEPPCO convention

(Continued from Page 21)

livestock and dairy industries of the region are also in jeopardy if the bankrupt rail lines are not salvaged. Consumers would also be confronted with increased food prices in the retail stores.

"The proposed ConRail System would include approximately 15,000 miles to be purchased from the bankrupt lines. Some 2,500 or more miles are proposed for sale to the solvent railroads of the region. The 5,700 miles of light density lines would be eligible for a two-year trial operating program supported by state and federal subsidies. However, if use of these light density lines cannot be increased, they would probably be abandoned.

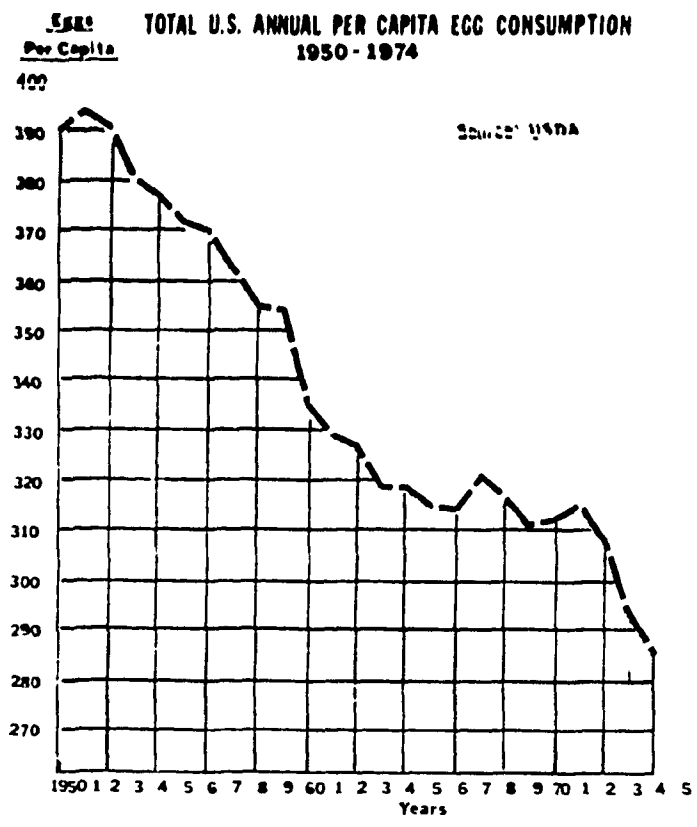
Aside from talks and panel discussions involving economics, the NEPPCO audience also had opportunities to hear veterinary scientists discuss diseases.

Dr. Swight Schwartz from Penn State informed the group that Mycoplasms diseases are widespread in commercial egg producing flocks across Pennsylvania and other northeastern states. These diseases are difficult to control once they are introduced on the farm, he said. However, either or both of the Mycoplasms diseases can be controlled if the poultryman is determined and willing to do whatever is necessary to accomplish the job. Various methods of control include eradication, medication, and inoculation of replacement flocks.

F. K. Willis of Sterwin Laboratories, Inc., Millsboro, Del., told the group that infectious bursal disease, which was first seen in Delaware in 1957, is now reported in all major poultry producing areas of the world. The vrius responsible for the disease is reportedly very resistant and outbreaks occur in subsequent flocks placed in a contaminated house.

A third speaker on diseases was Stanley Smith who reported on mycotoxins and mycotexicosis.

What's ahead in the poultry industry in years to come was the topic of discussions presented by Dr. Robert R. Spitzer of the Food for Peace Program, U.S. Department of State; Dr. James E. Martin, vice president for agriculture at the University of Arkansas; William Groseclose, vice president of Rockingham National Bank, Harrisonburg, Va.; Fred Adams Jr., president of Cal-Maine Foods; and C. F. Dickson, vice president of the Federal Land Bank of Baltimore.



Planting reminder given

HARRISBURG - Landowners interested in planting tree seedlings for reforestation purposes next Spring are reminded by the Department of Environmental Resources that now is the time to prepare the planting site to avoid delays in the actual planting.

Samuel S. Cobb, Director, Bureau of Forestry, said that weather conditions during October and November normally are excellent for clearing a planting site of any sod, weeds, brush or undersirable trees in order to plant pine, spruce or larch.

Plowing and disking of an area are required for planting hardwoods such as oak, walnut, tulip poplar or hybrid poplar, said Cobb.

The small size of the seedlings, usually less than 12 inches in height, makes it necessary that the site be cleared and maintained to eliminate shade from grass and weeds during the first year of growth.

Seedlings are available at low cost from the Department's Bureau of Forestry to plant for future wood products or for watershed protection. They may not be used for windbreaks, ornamentals, shade or Christmas trees.

The landowner must have at least one and one half acres of open ground to plant the minimum order of 1,000 seedlings.

To obtain more detailed information and the necessary application for ordering seedlings write to: Nurseries, Department of Environmental Resources, P.O. Box 1467, Harrisburg, Pa. 17120.

Farmers market termed success

By Dieter Krieg

HARRISBURG — The Farmers Market at the Farm Show Complex parking lot, which has been in operation since July 15, is nearing the end of its first season and is being dubbed a success by vegetable growers who have participated.

Conceived by the Pennsylvania Department of Agriculture, the market has been in operation every Tuesday and Friday — rain or shine — and has attracted farmers from more than 50 miles away During the peak of the season, more than 40 vegetable and fruit growers took part in the program Now, near the end of October, with the days of the market numbered, only 14 remain

Participating farmers liked a number of things about the sales facilities, but also had some suggestions for improvements Regardless of their feelings they all indicated a willingness and even an eagerness to participate again next year

Earl Miller of Dover R3, for example, thinks retailing is the only answer Owner of a 10-acre vegetable farm and 100 hives of bees, he sells all of his products directly to the consumer either in Harrisburg or at his stand in York. This year he moved approximately half of his produce through the Farm Show lot.

"I estimate a couple thousand people came through here in a week when we were really busy," said Ernest Retherford, a farmer from Middletown R1 who specializes in watermelons and cantaloupes He took about 10 per cent of his produce to the Harrisburg market this year and is hopeful of bringing more next year if the facilities open earlier next year

Weather seemed to be one of the major problems the farmers had at the open market place Heavy rains a few weeks ago really hurt them, they said adding that light rains weren t too bad

On a particularly rainy day we can count on taking 90 per cent of our produce home — we don't even bother to unload," one fellow said

Robert Morgan travels 55 miles one way from his 10-acre vegetable farm near Pitman He told Lancaster Farming he sells all he can at the Farm Show and peddles the rest door-to-door in the Pitman area Besides that, he also maintains a stand at his farm When asked what the market needs most to be improved, Morgan unhesitatingly responded "more customers"

The Farmers Market at the Farm Show Complex parking lot has been a success according to vegetable growers who participated in it. Conceived by the Pennsylvania Department of Agriculture, the open-air market is now concluding its first season, and farmers who took part hope it will go on again next year.

"I haven't missed a day yet," Robert Wedde stated with a bit of pride when he was asked how long he had been coming to Harrisburg to sell his produce. "I like it real well, it's a good market," he said enthusiastically as he fetched a bag for a customer. "This is the coming thing," he continued, "people want fresh vegetables."

Wedde has a 30-acre vegetable farm near Hegins, Schuylkill County, which is located about 55 miles northeast of Harrisburg. He says he tends two other markets besides the one at the Farm Show, but sells nearly three-quarters of his

Christian school plans auction

Parents and teachers of the Conestoga Christian School will hold their 2nd annual Auction Sale and Open House next Saturday, November 1, starting at 9:30 a.m. The school is located three miles east of Churchtown on Route 23.

Both school buildings, elementary and high school, will be open to visitors all day. Everyone is welcome. Food bargains will be a special feature of this auction sale this Fall. Groups of mothers are busy making large quantities of apple butter, preserves and canned goods. Others are getting ready to bake genuine Conestoga-Valley shoofly pies, home-made breads, cakes, nut-and-fruit breads and literally thousands of home-made cookies of every kind. All proceeds of the sale will go to the Conestoga Christian School. Thrifty buyers will be interested in quarters of beef and hamburger to stock in their freezers. Some may even want to bid for a steer and have it custom-slaughtered at a local butcher for a low-cost supply of beef for the winter. Farmers within the school family have been feeding calves and heifers for the sale, while others will be bringing feeder pigs, fat cattle, spring rams and lambs to the livestock auction, which will be held at 1:00 p.m.

Fifty-pound bags of potatoes will be on special sale, as well as apples by the basket and cider by the gallon. Last year's sale was attended by over 1,000 persons from Lancaster, Berks and Chester counties. This year's sale promises to draw even more. Last year, visitors ate over 880 portions of chicken barbecue and 80 quarts of home-made ice-cream. They also took home over 200 pints of farm-made ice-cream and over 200 hame-baked pies.

Experienced grandmothers supervise the meticulous finishing of hand-made quilts, some with cross-stitched autumn-leaf design, some patchword quilts, crib quilts and baby afgahns. Of special interest to visitors will also be hand-craft. Amish dolls. Quilts and needlework will be auctioned off at 12 noon.

Home owners will be interested in some new 8 x 10 foot utility sheds and used furniture items on sale. Collectors may want to browse through hundreds of books and records, tables with new ceramics and hand-crafted items made by the boys and girls of the school in the shop and during home ec.

The events will be broadcast live over radio station WBYO-FM in Boyertown, which will transmit the singing of school groups from 2 to 4 p.m. next Saturday afternoon.

Conestoga Christian School has an enrollment of about 160 students in grades K through 10 now, and serves patrons from Eastern Lancaster County, Southern Berks County, and Northern Chester County. In this day of rapidly rising school taxes, friends of the school like to point out that this private, parent-operated school saves local taxpayers close to $250,000 a year in local school taxes.

All area residents are cordially invited to bring the whole family to the sale; to enjoy the food, the fellowship and the singing. The sale will be held "rain or shine", according to Stephen Esh, a patron from Morgantown, who is in charge of the sale.

Calendar

October 24 - Archery Deer season closes

Farmer market

|Continued from Page 24|

produce here. His main criticism of the market is its vulnerability to bad weather, and he hopes it will open sooner next year.

Managed by Robert Stine of the Pennsylvania Department of Agriculture, the marketing facilities cost farmers six dollars per stall Measuring 15 feet wide, each stall provides its renter with parking and sales space Fees collected from stall-renters go towards promotion and advertising The sales organization itself is operated on a non-profit basis

To illustrate his satisfaction with the market, Wedde explained that he once came with 25 bushels of beans, thinking that it was certainly too many and he'd have to take a lot of them home again. To his surprise, he sold them all, and he believes he could have sold another 25 bushels besides. "By comparison," he continued, "back home I only sell a couple of baskets." Another advantage he cites after his experience here this year is that he'll know what to plant next year.

Leroy Pfautz of Stevens R1 believes the market was a success — but it has really slowed down since Hurricane Eloise came through the area last month. People apparently realize that the growing season has ended and are coming in fewer and fewer numbers. Consequently, many of the farmers have left — and those who return come with less to sell than they had several weeks ago. To counteract the dwindling supply of fresh vegetables, Pfautz brings such items as woven baskets to the market.

Marketing 15 to 20 per cent of his produce in Harrisburg, Pfautz concludes that the market is worthwhile for him because it's only a two-days-a-week market. His stand at home operates six days a week The Lancaster County vegetable grower has a 79 acre farm to supply his retail needs at both markets

Like most of the others interviewed last Tuesday, Pfautz thinks the market needs more customers. 'We had enough people last summer, but not now," he asserted He also felt that some kind of protection was needed from the weather. "It rained on about half of the market days at one time or another," he explained.

As for the future of the market, Pfautz thinks there's potential for it "This is a beautiful spot — nice parking, and access to customers," he remarked.

Pfautz claimed he sold much of his produce cheaper here at the Farm Show parking lot than he did at home The simple explanation for that is that there was a competitive factor to reckon with here, while that was not so noticeable at home. "We were selling corn and tomatoes at wholesale prices here," he admitted, "but at least we moved a big volume."

The market is described as "so far so good" by the Labenberg Brothers of Zion Grove, in northern Schuylkill County. Participants since the market opened, the brothers intend to come back again next year in spite of several disappointments. Drawing on vegetables grown on their 25-acre farm, the brothers marketed about half of their produce here and the balance at a roadside stand at their farm. The finding was that some of their vegetables move faster in Harrisburg than back in rural Schuylkill County. "Others don't move so fast, however," Labenberg added quickly.

As far as Labenberg is concerned, the market can be improved upon through better management. "It wasn't organized well enough," he said scratching his head, "but don't ask me to explain that."

Labenberg believes the market was a success, and like most others, he believes it could be even better next year. The general feeling is that the market should open sooner in 1976, and some kind of stipulation should be decided upon to benefit the farmers who participated in the experiment and made it a success. Labenberg does not think it would be fair for the market to open to just anyone next year, without compensating original participants for their efforts.

Youths can hunt - must be with adult

A new Game Law provision now permits 12 and 13-year-old hunters to be accompanied by any adult who is 18 years of age or older.

Previously, 12 and 13-year-old hunters had to be accompanied by a parent or guardian or some other adult member of the family.

Now, any adult 18 years of age or older, with the approval of the parent or guardian, may assume the role of a parent or guardian in accompanying a 12 or 13-year-old youth while hunting.

Prior to the Game Law change, it was nearly impossible for some youngsters 12 and 13 years old to enjoy sport hunting if they were unfortunate enough to come from a family of non-hunters. The new provision will also take care of cases where the parents may be separated or divorced, where a parent may be deceased, etc.

Those active in the "Big Brother" plan and similar programs will find the change in the law helpful in carrying out wholesome outdoor activities with their young charges.

Lewisburg Grange meets

Welfare reform legislation that would provide programs and services "for the benefit of those persons who are in need of assistance," has been recommended in a resolution adopted by Valley Grange of Lewisberry.

The resolution, which has been forwarded to the Pennsylvania State Grange for its consideration at the annual convention in Lancaster Oct. 27-30, also urges that "employable welfare recipients be required to accept gainful employment when it is available and offered to them in order to remain eligible for continued welfare payments."

It also recommends that "voluntary termination or interruption of employment shall not be acceptable grounds for welfare assistance."

In adopting the resolution, Valley Grange pointed out that the original intent of the welfare program in the United States was to assist persons in need. It cited the growth and expansion of welfare programs "beyond the intent of the original law," and the resulting financial burden this places on taxpayers.

Horse show

|Continued from Page 16|

Other feature events of the seven-day show included a special police competition with teams from the Pennsylvania State Police, Philadelphia, Washington, and Baltimore performing. There was also a Ladies Barrel Racing class, as well as the usual classes for gaited animals, walking, Morgans, jumping, and Hunters.

Radio and television personality Arthur Godfrey, who is known all over the country as a lover of horses, made an appearance at the show on Wednesday, Thursday, and Friday. He will make a fourth appearance tonight during the conclusion of the show. Show time is 7:30 p.m. Tickets are $4, 5 and $6, depending on their location and whether or not they're reserved. A specially-priced ticket for those who wanted to see all events was made available to fans for $30.00.

US-Soviet grain deal displeases Farm Bureau

PARK RIDGE - The initialing of the U.S. - Soviet grain agreement formalizes a breach of faith with American farmers and ranchers by the Ford Administration, William J. Kuhfuss, president of the American Farm Bureau Federation, said here today.

"The Soviet agreement, announced by President Ford today, establishes a dangerous precedent for future political international commodity agreements, and constitutes further interference with the market system in world markets," the national farm leader said.

"I believe that the Soviet agreement, as far as farmers and ranchers are concerned, formalizes the breach of faith resulting from the default of the President in his promise at planting time of unfettered access to world markets.

"The initialing of the Soviet agreement formalizes that breach of faith as the agreement marks an apparent trend toward government domination of international trade in agricultural commodities. It is a precedent for other and more serious restricitve controls on farm exports.

"Government - to - government trading is wrong in principle as it means sharing world markets on the basis of political determination.

"The sell out of the Ford Administration to the AFL-CIO and maritime unions is represented in the higher rates to be paid on Soviet grain export shipments in the maritime agreement.

"The State Department has used farmers as political pawns in its diplomatic game through its manipulation of the marketing of agricultural commodities.

"Farmers and ranchers should not be misled into believing the U.S. - Soviet oil agreement provides any real solution to the energy crisis. The Russian oil imports in the agreement are only a drop in the bucket in our overall imports and are largely cosmetic to make the agreement seem attractive to farmers and the American public.

"Foreign exchange earned by billions of dollars of U.S. agricultural exports has been a major contribution in paying for the soaring costs of oil imports," Kuhfuss said.

1958 GMC 3 ton, 12 ft. stake, No. 2 inspection, good rubber. 215-777-9351.

English Program

Regarding the English Second Language program, Dr. Winger told the Board that there are now seven Vietnamese children in grades one through 12, one in kindergarten, and one Ugandan child and one Korean child in kindergarten, none of whom are fluent in English. He also said there "probably will be more to come."

Under state law, a school district must provide a special English program for any child not fluent in the language. Last year the district spent approximately $3400 on this program and had budgeted the same amount for this year, before the influx of Viet families at the Gap.

Dr. Winger said that the program could be acquired through Intermediate Unit 13, which would send a teacher into the district, at a cost of about $5,000. The Board authorized Dr. Winger to go ahead with the IU 13 program.

Cards Of Thanks

THANK YOU

It is with deep feeling of unworthiness and a loss of words that we wish to give an expression of appreciation to all who shared and helped in our experience of the loss of our barn by fire.

It is quite heart - warming to know we have such wonderful neighbors and friends.

A special thank-you to the fire companies for the good work they did in saving the dairy equipment. We want to say many thanks to all of you for your fine cooperation and willing, helping hands.

May God bless each one of you is our prayer.

Joseph and Ruth Boll
Richard and Esther Boll

New Holland artist designs poultry - egg coloring book

by Sally Bair
Feature Writer

When Kenneth Kuipers suggested to his wife Dona that she design a coloring book about eggs, she took up the challenge and just three weeks ago had the thrill of seeing her first coloring book come off the press.

The book, entitled "The Chicken and the Incredible Edible Egg" is educational fare for youngsters and their mothers alike, containing a wealth of information about the egg.

Dona Kuipers, New Holland, said the project got started when her husband "made the statement 'you ought to do a coloring book.' " She said, "Our minds clicked and the project got started.

"It was just an idea, but the more invloved we got the more enthused we both got. The more we got to thinking, the more we realized that it really was possible."

One of the reasons they became inspired to immortalize the egg in art form is that Kuipers, a Michigan native, has long been associated with the poultry industry. For 19 years he was a salesman for poultry equipment and for the past seven years he has been selling the plastic cartons in which eggs are packed.

Through their work with the industry, Dona said, they picked up much "beautiful literature about eggs," but nothing aimed at educating children about the benefits of eggs.

One of her purposes, she says, is to get across "the way I feel about eggs. They are a good natural food. I want to give the true facts - that eggs are high in protein. Eggs are a better food than most people give them credit for."

So an educational format was chosen - as well as a fun one. Dona decided to do poems to tell the kids the story and have a factual story to tell the mother about the nutrition. In for foreward, it states: "While the illustrations and poems in this book are created for children, the facts of the egg processing are truly represented."

Dona adds, "It is something we feel the housewife is getting her money's worth, and it is fun for the kids."

The finished product is an 11 x 16 inch book, with 48 pages. But that was not what she thought it would be originally. At first Dona prepared art for a much larger coloring book. But it was soon discovered that such a large book would be unweidly and "the supermarkets wouldn't want to bother with it and the housewife wouldn't pay the price of a really large coloring book."

Distributing the coloring books is the next step for Dona Kuipers, who has been mailing the books far and wide to interested organizations.

So they scaled down the book until it "handled easier. It is big enough to by eye-catching, and it can be sold at a reasonable price." The suggested retail price if $1.49.

From the professional appearance of the coloring book, one could never guess that Dona has had no formal experience or education in art. She said, "I had no training, but I always loved to draw. As the mother of three children," she said, "I loved kid's books, and over the years I have bought millions of coloring books! I just stumbled through the book on my own."

After the decision was made to tackle the job, Dona made many discoveries. "Just to make the book about the egg would have been dull." So she deicded to add the chicken to her story. That too, presented a problem, according to Dona, because in the end, "You couldn't put her in the stew!;;

Dona first wrote the poems, then worked with her husband on the narrative for accuracy. "Doing the poems," Dona said, "Is the really fun part. You must use simple words." Another discovery she made was that there are very few words which rhyme with egg.

Doing the sketches "isn't a problem," she said, despite her lack of formal training. "I worked eight or ten or twelve hours a day for three weeks. And sometimes I would have to do five or six sketches to get just the expression I wanted."

The illustrations for coloring are simple and amusing - sure to please the young ones for whom it is intended. And the poems and narrative tell the story simply and directly. A sample follows:

Homestead Notes

"The egg now must be 'candled'.
That means going over a special light
To see if it is clean and fresh
and the quality is just right."

"Only trained personnel handle the candling of the egg. As the egg passes slowly over a special light, the candler can pick out any eggs with defects such as bad shells, eggs that are not 'egg shaped,' cracked shells, along with any other defects."

"Scramble, fry or poach them
Morning, noon or night.
No matter when you eat them
They are sure to be just right."

"Eggs truly are becoming more and more the 'main dish' for many meals. The egg is one of our most complete foods, and remember, it is a completely natural food."

Producing the coloring book was no easy matter. Although the poems came easily and the sketches were done without a great deal of agony, those were really just the first steps. The Kuipers formed "Know About Publications, Inc." to produced the book, and then worked on coyprighting the logo, "Did You Know About Book?" There was also the matter of contacting printers and working with them through all stages of production.

When asked if there were any interesting problems they ran into in producing the book, Dona said with a laugh, "Every time we turned around there was another one." My husband ran them all down."

Here's the cover of Dona Kuipers' new coloring book - "The Incredible Edible Egg."

Her first reaction to seeking the printed publication was, "I was worried. I looked at this and looked at that and was very concerned about mistakes. For instance, I wish I had taken more time on the cover." There were some minor mistakes in the first printing which will be corrected on subsequent runs.

Now Dona is in the very time consuming task of mailing out samples of the publication in an effort to begin distribution. Initial distribution will be through packers, who hopefully will see that the book find their was to supermarkets and schools. Dona was on the program at the Northeast Poultry Producers Council convention in Hershey this week talking about the book and ways of distributing it.

Dona said, "Ther response has been real good so far." And of course, she says she will be proud "if people life it."

(Continued on Page 44)

For three years Dona has been running a mail order distribution of egg carton craft booklets. She also has had requests for unprinted egg cartons which she shows here in abundance.

Country Corner

That chicken just 'ain't' what it used to be . .

By Melissa Piper

While attending the NEPPCO (poultry producers) convention on Wednesday of this past week, I couldn't help overhearing a woman telling her friends about the great new taste and quality of chicken these days

The woman, who had traveled from New York, told her friends how hard it had been a few years ago to cook those "dumb birds" "Now," she explained, "they're so tender and cook up so well you have to rearrange all your cooking times"

Not only was the woman appreciative of the better quality but also the relatively inexpensive price of the meat

While a convention meeting is hardly the place to cross sample the consumer's attitudes toward agricultural products, the conversations did relate the fact that people are beginning to notice that here in the United States, the food is improving and at a relatively low cost (despite consumer beliefs)

It is a well known fact that in the United States we have a great variety of food from which to choose and in almost every conceivable form - from frozen meats to canned vegetables and boxed goods. Our supermarkets must truly seem like a fantastic dream to a foreign visitor who is used to seeing just a few products in a market without the shining grocery carts, fancy displays and "early bird specials."

Continuing research has given us a variety of fruits, beverages and also the "tender chicken" but such goes unnoticed by many of the consumers who feel food is too highly priced. Before reflecting on the principals which helped to create the food consumers toss in their basket, the only reaction which seems to cross their minds is the price.

Little do they know that the percentage of their earnings which goes for food is very small compared to many countries of the world.

Agricultural forecasters have recently announced that the price of food will probably be about 9 percent above that of last year. But before you gasp - why not realize that in the two previous years the increase was 14 percent While it can be noted that the total personal consumption expenditures rose in the second quarter of this year most of the gain was caused by people eating out at restaurants. Expenditures for food at home rose only fractionally! Just how many consumers realize that fact?

While farmers realize many of these ideas and understand the circumstances, many consumers especially in the urban areas fail to really comprehend the importance of the food prices and quality.

But the consumers cannot be fully blamed, for many times they just don't know about the research and effort which goes into making a good wholesome product They expect the best and feel hurt when something seems wrong.

We as farmers and agribusiness personnel must help consumers understand that food just doesn't spring from the shelves and freezers of the supermarket, but takes time and development with a spattering of good weather and luck.

Thank goodness that "stewing chicken" has improved in quality, for it shows that farmers, producers and agribusiness isn't halted at a standstill. Now let's get that fact to the consumer and we might not have to suffer through all those boycotts and complaints!

(Continued from Page 42)

The Kuipers have lived in New Holland for 25 years, having moved east from Holland, Michigan. While Dona enjoys living in the New Holland area she said she misses the water in Michigan. They have three children: Kenneth, 24; Kathy 23, married with two children; and Kerry, 18, a freshman at Penn State majoring in physical education. Her children, Dona said, loved the idea of the coloring book, and "we all found out a lot of things we didn't know before."

Homemaker Dona declares, "I never worked outside the home at all." In Michigan before she was married, however, she worked on fashion layouts and window displays.

Her artistic talent is natural. She said, "I always loved all kinds of crafts. I do one thing for awhile and then something else." Her abilities ranged from leather tooling to oil painting.

Dona feels very much a part of the poultry industry however, and three years ago began what she describes as "a small mail order business" in which she distributed egg carton craft booklets, and occasionally unprinted egg cartons themselves.

This ties in closely with her husband's work, of course, since the requests come from coupons printed on the lid of some of the plastic cartons he distributes. In three years she said she has mailed about 20,000 sets of craft booklets.

Now that she has seen the successful creation of her educational coloring book, Dona feels there could be quite an endless variety of follow-up publications. She has already begun work on "The Dairy Cow and her Marvelous Milk." Many other topics have been suggested to her.

Dona's pride in her creation is obvious and well-deserved. She said, "We feel it is a good, true honest story for children." It is also the first of its kind.

The poultry industry stands to gain a lot of goodwill through of the coloring book - and children and their mothers stand to learn a lot about "The Incredible Edible Egg!"

Ida's Notebook

Ida Risser

The first day of hunting season and the hunters will converge on the farmlands from every direction. There appears to be alot of grey squirrels in the woods but the nut supply is not plentiful. Some black walnut trees which bore bushels last year did not have one nut this year. Luckily other trees bore some and we have a reserve from last fall.

Last weekend our children had a craft fair to give people ideas for Christmas gifts which could be made instead of simply bought at the last minute. I showed several kinds of nuts from the hull stage to the dried stage to the glass jar of kernels ready for cookies and cakes. Many people asked questions about drying them and whether or not shellbarks and shagbarks are hickorys. They are.

I also displayed jams, jellies and relishes which can be used as gifts plus a dozen varities of canned goods.

But the item which received the most attention was the fresh and dried assortment of teas. I served hot and cold samples and many folk couldn't believe that tea leaves plus water and sugar produced what they were drinking. They kept asking what "brand" tea I used.

Sometimes, I get so frustrated when I can't accomplish all that I want to do. They say we do what we really want to do but I'd say not all that we want to do.

While I'm painting window frames I'm not potting flowers for winter and there is a certain urgency in October. When I'm being chauffer for someone I'm not making that apple pie I've had on my mind. And so one picks and chooses among the many chores and responsibilities of a farm wife.

xxx

Rock Cornish Game Hens

6 rock Cornish game hens, approximately 1 lb. each
Salt
Pepper
1 cup butter, melted

Defrost rock Cornish game hens according to package directions. Season lightly inside and out with salt and pepper. Place breast side up on rack in a shallow roasting pan. Brush liberally with melted butter. Roast uncovered in preheated hot oven (400 degree F.) approximately 45 minutes or until tender and done. Towards end of baking time, baste several times with melted butter. Serve with Mushroom Sauce Sauterne. Makes 6 servings.

Twin Valley to host pumpkin contest

The Twin Valley Future Farmers of America will host their fifth annual Pumpkin Growing Contest on Friday evening October 24, 1975 in the Twin Valley High School Cafeteria and Auditorium. All students, teachers, and preschool children having pumpkins for the contest should bring them to the cafeteria between 7:00 and 7:30 p.m. All pumpkins should have the grower's name, school, and age attached to them. Pumpkins of elementary students and pre-school children should also have the parents name and address attached. While the pumpkins are being judged by the FFA members, the film **Fun and Fancy Free** will be shown in the auditorium. Everyone is invited to view the film - whether they have a pumpkin to enter or not. Following the film, winners will be announced, and prizes will be awarded to all winners.

The pumpkin growing contest is open to all preschool children residing in the Twin Valley School District, all children enrolled in the Twin Valley Elementary Schools, and all employees of the Twin Valley School District. All pumpkins entered must have been grown from seed distributed by the FFA last spring. Over 1000 packets of seed were distributed. Pumpkins will be judged in three categories - heaviest pumpkin, most unusually shaped pumpkin, and best decorated pumpkin. Students may enter one pumpkin in each category. Appropriate ribbons and trophies will be distributed to all winners, and monetary prizes to all first place winners. Cost of the contest is entirely paid by the Twin Valley Chapter Future Farmers of America through their fund raising activities.

Winners in last year's contest were: James Samuels - most unusually shaped pumpkin, heaviest pumpkin - Kevin Martin, and pumpkin with the largest circumference - Soctt Stoltzfus. Mrs. Barbara Reznick displayed the heaviest pumpkin grown by a teacher.

Farm Women Societies

Society 25

Farm Women Society 25 met recently at the home of Mrs. John Gerlach. Sixteen members answered the roll call. Donations were given to the Welsh Mountain Clinic followed by an election of officers. Mrs. Carl Gish was elected as president with Mrs. Sterling Elmer to serve as vice-president. Mrs. Raymond Mylin will serve as secretary and Mrs. Glenn Nauman will be treasurer. Following the business meeting a sewing session was held with a mystery sale concluding the meeting.

The next meeting will be held at the home of Mrs. Carl Gish on Nov. 8.

Society 31

The October meeting of the Farm Women Society 31 was held recently at the home of Mrs. David Delong with Mrs. James Landis serving as the co-hostess.

A donation of $100 was given to the Solanco Fair Association.

Committees for the coming year were selected before the evening program. Mrs. Donald Rish, showed a slide presentation on a recent trip to Russia.

Society 19

Farm Women Society 19 met Oct. 18 at the home of Mrs. Scott Nissley in Lancaster. A dessert party was held with Mrs. Harold Saylor giving the devotions.

Mr. David Griffith, representing St. Joseph's Mobile Life Support System, gave a slide presentation and talk on the emergency unit and its work in the area. The Society pledged $25 to the mobile unit.

The Society is planning on having a food stand at the Farm Women's Holiday program to be held Nov. 13. Items are asked to be donated for the stand.

Mrs. Paul Hollinger was elected recording secretary for the Society with Mrs. J. Wilmer Charles as corresponding secretary.

Donations were given to the Foster Child and the United Way. The next meeting will be held at the home of Mrs. H. Clarence Newcomer on Nov. 8, at 1:30 p.m.

The next meeting will be an evening of crafts at the home of Samuel Glick.

Society 23

The October meeting of Farm Women 23 was held at the home of Mrs. Robert Rohrer, Washington Boro R1. Mrs. Lester Necomer had charge of the devotional period.

Plans were completed for bowling at Leola Lanes on Oct. 18 and donations were $100.00 to the Community Action Program at Columbia; $200.00 to the family of the late Robert Weiss; and $10.00 to the Korean Orphan for Christmas.

The county convention is Nov. 1 and our donations to the Bazaar table will be greatly appreciated.

The election of officers resulted in Mrs. Ed Funk, Pres. and Mrs. Glenn Burkholder Vice Pres.

The next meeting will be at Stauffers of Kissel Hill on Nov. 4 at 7:00 p.m.

Society 14

Farm Women Society 14 members and husbands enjoyed a Halloween Party recently. Approximately thirty joined in the games, fun and refreshments held at the home of Mr. and Mrs. Arthur Groff. The other hostesses included: Mrs. Harold Groff, Mrs. Robert Rowe, Mrs. Robert Esbenshade, and Mrs. Everett Newswanger.

Our next regular meeting will be held Nov. 12 at the home of Mrs. Paul Longenecker. We will be learning the art of Scherenschnitte (paper cutting). Please bring a manicure scissors and glue. Also don't forget the Lancaster County Farm Women Convention on November 1.

Society 22

Farm Women Society 22 recently held their October meeting and enjoyed a tour of the Lancaster County area. Twenty-four members visited the Ephrata Cloisters, the Pretzel House in Lititz and the Wilbur Chocolate Company in Lititz. A luncheon was held in the Chimney Corner Restaurant and was followed by a short business meeting.

Society 22 will be entertained by Society 5 on Oct. 25 at 1:30 p.m Sally Bair was installed as a new member of the group.

The next meeting will be held at the home of Mrs. Cloyd Wenger, 1904 Pioneer Road, Lancaster at 10:00 a.m. A program on decoupage with Darlene Herr will be given.

The yellow color of the withered mistletoe branch was thought to be endowed with the power to discover buried treasure.

Dauphin Co. Society 1

The Dauphin County Society of Farm Women, Society 1 held their monthly meeting on October 14, 1975 at the home of Dolly Pickle at 7:30 p.m. Co-hostess for the evening was Ruth Rife who was also in charge of devotions. Roll call was taken with 17 members and two guests answering.

Thank you notes were read by the President, Ruth Oberholtzer, from Lydia Rambler for the flowers and visits and also from the flowers State Hospital for the good grooming kits we provided.

It was also decided that $10.00 be donated to the State Hospital toward the purchase of a tape player for their adolescent patients.

The group also started to make a Halloween Masquerade Party. Beautiful decorations and delicious refreshments were provided with gifts for all who attended. A good time was had by all.

The election of officers was held with the following results: President, Bertha Kennedy; .Vice-President, Kathy Moffatt; Treasurer, Daisy Cassel; Recording Secretary, Jean Jannsen; Corresponding Secretary, Barbara Fisher.

The next meeting of the Dauphin County Society of Farm Women, Society 1 will be held on Nov. 11, 1975 at 7:30 p.m. at the Homerstown Church. Daisy Cassel will be hostess.

Following the business meeting, Gail Malsbury and Betty Wessner gave a demonstration on candle making.

The next meeting will be held at the home of Mrs. Dorothy Hoffman on Oct. 28.

Society 3

Society of Farm Women 3 met Saturday, October 18 at the home of Mrs. Carroll Myers, 1127 Lincoln Hts. Ave., Ephrata.

The following business was conducted by the president, Mrs. Jesse Balmer. Election of officers for 1976 - Pres., Mrs. John Edwards, R1 Ephrata; Vice-Pres., Mrs. Luther Moore, R4 Lititz; Sec., Mrs. Earl Miller, Hopeland; Corresponding Sec., Mrs. Carroll Myers, Ephrata; Treas., Mrs. Ivan Eberly, Ephrata.

Delegates elected to the State Convention of the Society of Farm Women in January at Harrisburg are: Mrs. Robert Hollinger, Elm; Mrs. Luther Moore, R4 Lititz; Mrs. Walter Shaub, Reamstown alternate.

A contribution of $50 was made to the United Way and $25 to the Ephrata Area Social Service.

Mrs. Harry Usner, Mrs. Ray Weinhold, Mrs. Earl Miller and Mrs. Walter Shaub will be in charge of the table of seasonal decorations at Homemakers Day at the Farm & Home Center, Nov. 13.

Members entertained their husbands, Friday evening, October 17 at dinner and the races at Penn National Raceway at Grantville.

The speaker was Mrs. Lloyd Weaver from the Ephrata Area Social Services.

Next meeting will be Nov. 15 at the home of Mrs. Melvin Nolt, R1 Ephrata. It will be creative day and members are to bring for display items they have made, or their hobby.

TRAVEL TIPS AND TRICKS

Take advantage of special off-season weekend rates and package plans offered by many hotels and motels Write for free brochures, directly to the places you'd like to stay or to state or city travel departments

This week we are featuring some recipes for meat dishes and desserts. Our junior cooks have really been busy sending in their recipes for the fall months.

For some interesting ideas and recipes for cooking lamb - see our Home on the Range column.

Lemon Pudding Cake

4 eggs, separated
1 teaspoon grated lemon rind
1 tablespoon melted butter
½ teaspoon salt
one-third cup lemon juice
1½ cup sugar
½ cup sifted flour
1½ cup milk

Beat together egg yolks, lemon juice, lemon rind and butter until thick and lemon colored. Combine sugar, flour and salt. Add to the egg mixture alternately with milk beating after each addition.

Beat egg whites until stiff. Blend into batter using low speed. Pour into 8 inch square pan. Set in a pan of hot water and bake at 350 degrees for 45 minutes or until golden. Serve warm with whipped cream.

xxx

Peanut Butter Pie

Filling for pie:
¾ cup confectioner's sugar
½ cup peanut butter
two-thirds cup granulated sugar
3 tablespoons cornstarch
1 tablespoon flour
Pinch of salt
3 egg yolks
3 cups milk
2 tablespoons butter
1 teaspoon vanilla

Beat 3 egg whites until stiff. Add ¼ teaspoon cream of tartar and ¼ cup sugar. Cream confectioners sugar and peanut butter until crumbly and set aside. Stir next eight ingredients together in sauce pan. Cook over medium heat, stirring constantly. Bring to just below boiling point and cook a few more minutes. Sprinkle two-thirds cup peanut butter mixture into baked pie shell. Pour custard over this. Spread beaten egg whites on top. Bake at 350 degrees until brown.

Ella Mae Zimmerman
New Holland, PA

xxx

Beef Croquettes

3 cups ground leftover beef
½ teaspoon salt
¾ cup gravy
1 tablespoon minced onion
1 cup dried breadcrumbs
1 egg
3 tablespoons water
Shortening

Mix together the beef, salt, gravy and onion. Chill several hours so you can shape croquettes easily. To coat; roll croquettes in breadcrumbs, then dip into liquid (3 tablespoons water added to slightly beaten egg). Fry in a generous amount of shortening.

Angus activities scheduled

Members of the American Angus Auxiliary are urged to attend and take part in the annual activities of the group during theAmerican Angus Association annual meeting scheduled during the North American Livestock Exposition, Louisville, Kentucky, November 16-18.

In an effort to avoid other show activities, the Auxiliary is planning an open board meeting at 2 p.m., Sunday, November 16, at the Executive Inn. This meeting will be devoted to the various Auxiliary business and election of officers for 1976.

The following morning, November 17, a breakfast meeting hosted by the Tennessee Angus Auxiliary will be held at the fairgrounds at 7:30 a.m. The open class heifer show will begin at 8 a.m.

All Augus Auxiliary members and friends are invited to the activities.

Farm Activities

A family style turkey supper will be served at the Old Penryn Fire Hall on Nov. 1, time 4:00-8:00 p.m. Dinner will be served by the Ladies Auxiliary to the Penryn Fire Co. Proceeds to benefit the Ladies Auxiliary.

Recipe Exchange

Home on the Range

This week we are pleased to feature some new and tasty recipes for using lamb. Lamb is very easy to cook and can be prepared much like any other red meat. While the leg of lamb and lamb chops have been the popular cuts over the years, many people are beginning to try other variations of the meat such as chopped meat and lamb patties.

We hope you enjoy these recipes and try using lamb with other meats to give a variety to your menus.

Barbecued Sirloin Lamb Chops
(6 servings)

6 (1½" thick) sirloin lamb chops, about 3 pounds
Salt and pepper
1 can (8 ounce) tomato sauce
2 tablespoons molasses
1 tablespoon cider vinegar
½ teaspoon instant minced onion
¼ teaspoon barbecue spice
⅛ teaspoon tarragon leaves
⅛ teaspoon dry mustard

Sprinkle lamb chops with salt and pepper. Combine remaining ingredients. Grill chops 6 to 7 inches from source of heat, 12 to 15 minutes per side or until desired doneness; brushing frequently with sauce. Serve lamb chops with remaining sauce.

xxx

Lamb Meatballs En Brochette
(6 servings)

two-thirds cup (small can) undiluted evaporated milk
1 egg
1 cup soft bread crumbs
½ teaspoon salt
½ teaspoon garlic salt
¼ teaspoon each: pepper, tarragon leaves and ground savory
1½ pounds ground lamb shoulder
12 large fresh pineapple wedges
6 plum tomatoes (about ¾ pound)
2 cucumbers, cut in ½ inch slices
Brown lemon sauce

Beat milk and egg together; add crumbs and seasonings. Let stand to soften crumbs. Add lamb, mix well. With moistened hands mold into 18 balls, about 1½ inches. Chill thoroughly several hours or overnight. Place lamb balls on skewers; grill 4 to 5 inches from heat, 8 to 10 minutes on each side, or until desired doneness, brushing frequently with brown lemon sauce. Place pineapple and vegetables on skewers; grill 5 minutes per side brushing frequently with sauce.

To prepare Brown Lemon Sauce
(makes about 1½ cups)

Mix together ½ cup each: lemon juice and salad oil, ¼ cup water, 2 tablespoons dark brown sugar, 1 tablespoon soy sauce, and ¼ teaspoon ginger.

xxx

Grilled Lamb Spareribs
(6 servings)

1 can (1 pound) applesauce
1 tablespoon lemon juice
2 tablespoons brown sugar
1 tablespoon honey
¼ cup chili sauce
1 tablespoon Worcestershire
½ teaspoon salt
3 pounds lamb spareribs

Combine applesauce, lemon juice, sugar, honey, chili sauce, Worcestershire and salt; blend. Add part of applesauce mixture to lamb. Cook on outdoor grill, 15 minutes or until lamb is done. Turn lamb during cooking period. Brush with remaining sauce mixture frequently during cooking period.

xxx

Creole Lamb Stew
(4 Servings)

2 lb. lamb neck stew pieces
1 can (12 oz.) Libby's Tomato Juice
1 tsp. Worcestershire sauce
⅛ tsp. Schilling-McCormick Minced Garlic
¼ tsp. salt
Generous dash Schilling-McCormick Pepper
8 small whole white onions
¼ lb. fresh mushrooms
½ med. green pepper, cut in 1" squares
2 tbsp. water
1 tbsp. flour
Cooked rice, as needed

Brown lamb in skillet; pour off fat. Add tomato juice, Worcestershire sauce, garlic and seasonings. Cover and cook over low heat 45 minutes. Add onions, mushrooms, and green pepper. Cover and cook 45 minutes longer or until meat and vegetables are tender. Stir now and then. Gradually blend water into flour until smooth; slowly stir into sauce. Cook, stirring until thickened. Cook with rice.

xxx

Hawaiian Leg of Lamb
(6 Servings)

1 4-lb. leg of lamb (boned rolled & tied)
8 tsp. lemon juice
2 cups of bread crumbs
4 tsp. butter
1 cup Libby's Crushed Pineapple, well drained
½ cup brown sugar (packed firm)
¼ tsp. Schilling-McCormick instant garlic powder
½ cup chopped pecans
2 tbsp. Schilling-McCormick parsley flakes
1 tbsp. Schilling-McCormick minced onion
½ tsp. Schilling-McCormick ground ginger

Brown bread crumbs in butter; add pineapple, brown sugar, garlic, pecans, parsley, onion, and ginger. Let stand 1 hour. Brush cavity of leg of lamb with lemon juice; fill with dressing, skewer and lace. Barbecue over low fire 3-4 hours or until done, or roast in 325 degree oven until meat thermometer registers 175-180 degrees.

xxx

Lamb Shanks in Herbed Tomato Sauce
(Makes 6 Servings)

1 tsp. salt
½ tsp. Schilling-McCormick Marjoram Leaves
¼ tsp. Schilling-McCormick Basil Leaves
¼ tsp. Schilling-McCormick Mint Flakes
¼ tsp. Schilling-McCormick Pepper
1 tsp. aromatic bitters
½ cup wine vinegar
6 lamb shanks (about 1 lb. each)
2 tbsp. flour
2 tbsp. butter or margarine
two-thirds cup water
1 can (8 oz.) Libby's Tomato Juice
Hot buttered noodles or rice

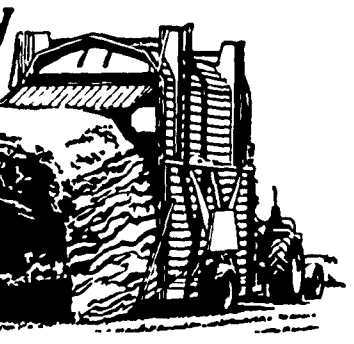
Combine salt, marjoram, basil, mint flakes, pepper, bitters and vinegar. Sprinkle over lamb; chill overnight. Remove lamb shanks from marinade and sprinkle meat with flour; brown in butter in skillet over medium heat. Lower heat and stir in water; cover and cook slowly 1 hour.

Garden goes bicentennial

The Schuylkill County Agricultural Extension Service will be conducting an evening program on Bicentennial Gardening on November 10, 7:30 p.m., at the Orwigsburg Senior Citizens Center (St. John's United Church of Christ Fellowship Hall) on Market Street.

The program is being sponosred by the Schuylkill County Cooperative Extension Service and the Orwigsburg Area Bicentennial Committee.

When the labor is all in the family



HESSTON StakHand 30-A

Here's the one-man way to put up quality hay And hay isn t the only crop you can handle with the HESSTON StakHand* 30-A Stover stacks can turn a residue crop into valuable feed, too StakHand hay or stover stacks resist winds and rains to eliminate the need for taxable storage structures And these are just a few of many reasons why you should consider a complete StakHand system With a StakHand, StakMover and StakFeeder*, one man can handle hay from field to feeding and never leave his tractor seat See us right away for all the details

Youths-women attend NEPPCO events

By Melissa Piper

HERSHEY — While the annual NEPPCO (Northeastern Poultry Producers) Convention offered a number of keynote speakers during their meeting held this week in "Chocolatetown," several special activities were also planned for the women and youths who were attending the program.

Some fifty 4-H members and FFA'ers from nine northeastern states were in attendance for the convention with many trying their skills during the judging competitions and the demonstrations.

Speaking with knowledge and force, many of the youths gave demonstrations in the fields of poultry science and agri-marketing.

Representing Chester County in Pa., Rachel Weinstock, gave a demonstration on using poultry products in soups. Miss Weinstock reminded the audience that "eggs provide a lot of protein and are relatively cheap compared to other protein sources."

Also presenting an outstanding demonstration on food was Kevin Dean, a 4-Her representing West Virginia. Kevin showed the audience how to make a chicken-macaroni salad for a picnic while giving a history of the animals and their nutritional value. "Poultry contains a lot of vitamins essential for good health," the 4-Her related. "we need to remember that chicken is a good nutritious food."

Later on Wednesday morning, 4-Hers gave demonstrations on poultry production and agri-marketing techniques. Glenn Comer, a young 4-H member from Virginia gave a talk on candling eggs and was followed by a number of colleagues giving demonstrations on making incubators and marketing eggs. The youths were judged on their presentations.

Women Travel to Mt. Joy

Several activities were also planned for the women present at the NEPPCO program. A large number of the ladies were in attendance for the 4-H poultry demonstrations held Wednesday in the Motor Lodge.

Later that day, the women were treated to a special luncheon at the Groff Farm near Mt Joy. Mrs Betty Groff, well known for her "Good Earth Cookbook" treated the women to a special meal of Chicken Stolzfus along with many homemade salads and vegetable dishes. Dessert was a special treat since many of the women were anxious to try the shoo-fly pie.

Following the meal, Mrs Groff answered questions and took the ladies on a tour of the farmhouse and their wine cellar.

A trip to the Susquehanna Glass factory and points of interest near Columbia was planned for later in the day.

One of the keynote speakers for the women was Mrs. Dona Kuipers, from New Holland. Mrs. Kuipers met with the ladies on Thursday morning to discuss her role in creating and publishing the "The Chicken and Incredible Edible Egg" coloring book. (A story on Mrs Kuipers is included in our Homestead Notes section.) Mrs. Kuipers designed the coloring book to bring attention to the poultry industry and to familiarize children with the production of the fowl.

Kevin Dean, a 4-Her from West Virginia, demonstrated how to prepare Chicken-Macaroni salad to an audience at the NEPPCO convention on Wednesday morning.

Both the ladies and the youths also toured the exhibition areas of the convention headquarters and joined with the men to hear numerous other speakers.

Program scheduled for Vietnamese families

Marcy Seckman, Ass't. Home Economist with the York County Cooperative Extension Service has planned a program on money management for the Vietnamese families of the county. To help the families to organize and use spending records to plan and manage money.

The meeting will be held November 5th, from 7:30 - 9:00 p.m. at St. Luke's United Methodist Church, King and West Streets in York.

Sponsors of the families are also invited to attend.

To register for the meeting call the Extension Office at 848-2101.

York youth elected leader

Linda Ebaugh was recently elected as president of the York County Lamb Club at a meeting held at the home of Laurie and Lisa Dobrosky. Other officers elected were Christy Waltersdorff, vice-president; Laurie Dobrosky - secretary; Donna Arendt - ass't secretary; Donald Flory - treasurer; Jay Caudill, ass't treasurer; Lisa Dobrosky - news reporter and Deb Lau - ass't news reporter.

A hayride followed the meeting with members roasting hotdogs. The club decided to have a covered dish supper for achievement night on Nov. 15.

Glenn Comer, a 15-year old 4-H member from Virginia, talks about candling eggs during the production - agri marketing demonstrations given at the NEPPCO convention.

Fall Pastures

With the liberal amounts of moisture during the past month we can expect fall pastures to be really good; with the normal grass varieties in this area there is little danger to permit animals on the grass pasture until snow flies; however, with the legumes such as clover and alfalfa, livestock should not be permitted to eat the forage while frost is on the plants; this could cause severe bloating.

LADIES, HAVE YOU HEARD?

By Doris Thomas, Extension Home Economist

Read the Label on Household Products For Safety

A label is worthless if you don't read it. Federal agencies are continuing to improve their protective services to the public.

For example, pesticide labels and patterns of use are being continuously reappraised and modified, in the light of new research information.

The label on each pesticide container is in fact an important legal document. This includes practically all bathroom cleaners, disinfectants, and sanitizers classified and registered as pesticides by the federal government. It represents 7 to 10 years or more of painstaking research, many thousands of hours of labor, involves 25 to 50 pounds of technical data typed double-spaced and cost up to $10 million.

All of this voluminous research is carefully reviewed by the Environmental Protection Agency investigators before any product can be sold. You, the user, have every reason to expect all claims on the label to be fair and reasonable.

The law imposes safeguards for the public but the most important still depends on you. All the research and precautions in the world are of no value if you don't read the label.

It's your responsibility to read the label, follow the directions listed and heed the precautions.

Noise on the Farm Could Pose Health Hazard

Life and work on farms has changed considerably in the last 25 years. One of the often unnoticed changes has been that "peace and quiet" has been replaced by a noisy environment, often at levels considered hazardous by health experts. Evidence is increasing that noise also affects man's nonhearing systems and his psychological state.

Noise affects people in different ways. However, everyone is affected by excessively high levels of noise depending on loudness, length of exposure, distance from noise, and pitch or frequency. A moderately loud noise for a long period of time can be just as hazardous as a very loud noise for just a short period of time.

During Agricultural Progress Days in August, 1974, a hearing survey was conducted through the joint efforts of the Cooperative Extension Service of The Pennsylvania State University and the Williamsport Hospital. A total of 83 farmers were given a pure-tone hearing test.

According to Donald Daum, Extension agricultural engineer, of the 83 farmers tested, only 18 indicated normal hearing. The remaining 65 indicated some degree of hearing loss. Of these 65, 38 demonstrated some patterns of noise-induced hearing loss. A dominant characteristic was that 24 persons showed a greater hearing loss in the left ear and only 9 persons showed a greater hearing loss in the right ear. The remaining 5 men indicated an equal amount of hearing loss in each ear.

Previous surveys have suggested that a possible reason for farmers showing a greater noise-induced hearing loss in the left ear than in the right is that most farmers operate their tractors while looking over their right shoulder to check equipment performance. Another factor attributed to the "left-ear deficit" is that many farmers are also shooters. Thus, continued exposure of the left ear to the muzzle blast of a shotgun may also be a contributing factor.

The results of the survey are not conclusive. But they do suggest that noise-induced hearing loss is prevalent in the agricultural community and that additional research is needed.

According to the Extension agricultural engineer, the first step in preventing the problem is to make the farmer aware of the hazard. The farmer must know that the noise emitted by his equipment can cause permanent damage to his hearing. After he has been informed of the damaging noise, he must use proper methods of preventing hearing loss such as the use of ear muffs or ear plugs.

To protect farmers and others from noise hazards, the Extension specialist suggests the following precautions:

1. Reduce the noise at the source. Maintain the engines, especially mufflers; adjust and lubrciate machinery or replace with quieter equipment.

2. Isolate noise from people. Move noisy equipment outside the room or building; enclose noise source with a noise barrier; or protect person from noise by using sound-conditioned cabs, acoustical ear muffs or ear plugs.

3. Limit high noise level exposure. Plan work for short periods in noisy conditions. Shift personnel among jobs or don't operate noisy equipment for long periods of time.

Family - children's service establishes speakers bureau

Family and Children's Service announced today the formation of a Speakers Bureau, as part of a continuing program to keep Lancaster Countians more in touch with agency happenings.

Consisting of members of the agency's Board of Directors, the Speakers Bureau will provide speakers and programming for local clubs and community organizations.

Highlight of the Family and Children's Service Speakers Bureau presentation will be a newly-developed 20 minute sound-slide presentation. It details the range of services offered by Family and Children's Services.

According to Allen R. Smith, Executive Director of the agency, the Speakers Bureau is another attempt to more clearly define the role of Family and Children's Service in the community.

"Over the years our responsibilities have changed drastically," Smith notes, "to the point where we're currently providing services many people in the community may not even associate with us.

"Through the Speakers Bureau we hope to introduce the full scope of our work to Lancaster Countians, enabling our public to better evaluate the services we offer, and the way we might be able to assist in their problem solving."

Smith points to two examples of the agency's new thrust. Our new program is the agency's work on behalf of senior citizens. The other is a newly developed program called advocacy, dealing with various organizations - the State included - considering ways to make it easier for people to get necessary services.

"If you went by our name along, we should be working only with children and families," Smith says. "But this is not so, as the advocacy program points out. We're interested that residents of Lancaster County become more familiar with all that we do. The Speakers Bureau will help us do just that."

While the film presentation will be the feature of the Speakers Bureau program, Bureau members will provide additional information not covered by the film. They will also answer questions from the audience regarding Family and Children's Service programs.

Groups and organizations wishing to schedule members of the Speakers Bureau in their programming should contact the agency at 630 Janet Avenue, Lancaster, 17601 or phone 397-5241.

Their hand stretches out

Almost everyone operating a small business at one time or another has questions about keeping records, filling out tax forms, meeting tax deadlines, and maybe even delinquent tax matters.

That's why the Internal Revenue Service is ready year-round to provide personalized assistance to the small businessperson.

Any place in Eastern Pennsylvania, for instance, a small business owner can call the IRS toll free on 1-800-462-4000 from 8:30-4:30 weekdays for answers to his or her questions. In Philadelphia, call 574-9900, in Allentown Bethlehem, call 437-6966 and in Harrisburg, call 783-8700.

McHale asks for streams clean-up

HARRISBURG - Pennsylvania Agriculture Secretary Jim McHale earlier this week asked farmers to get applications for aid in clearing debris from flood-swollen streams from their county Agriculture Stabilization and Conservation Service office (ASCS).

McHale recently met with a group of farmers from Bradford County, one of 30 counties along the Susquehanna River and tributaries struck last month by Hurricane Eloise, regarding stream clearance.

"A big problem we seem to be having," said McHale, "is one of communication. Farmers have been discouraged with talk that there is no money available for stream clearance and stream bank restoration."

Conservation aid in the wake of the recent flood involves state and federal cooperation. The Deaprtment of Community Affairs was charged with overall responsibility in the flood recovery effort.

The Department of Environmental Resources is the state agency that gives approval to farmers to enter streams with equipment to remove debris. Actual debris removal work is funded and supervises by ASCS and the Soil Conservation Service

The Bureau of Water Quality Management within DER has emergency stream clearance coordinators based in Wilkes-Barre, Reading, Harrisburg and Williamsport.

Funding for flood recovery work is derived through the emergency programs administered by ASCS and SCS. The program is designed to help farmers remove debris from farmland, reshape and relevel grades, restore permanent fences, and rebuild conservation structures and impoundments.

McHale pointes out that ASCS has accessible offices in every county which can serve as the originating point in securing federal and state aid for farmers. ASCS will have DER stream entry approval applications as well as its own emergency applications available.

"I know that ASCS is having difficulty in getting adequate funds for recovery work," siad McHale. "This is unfortunate. ASCS has always been an effective federal agency for us when properly funded. I think it is up to our farmers and those of us in the state administration to apply pressure to ensure that ASCS gets its needed funding during this crisis."

McHale urged farmers to visit ASCS offices to begin filing emergency applications "This is the best way to remind Washington that we still have a mess to clean up in Pennsylvania."

McHale said he has held meetings with the Crop of Army Engineers and officials from ASCS, SCS and DER. "Farmers have been in to show pictures of their farm damage," said McHale. "We will continue to maintain close contact with federal and state officials connected with rural flood recovery efforts until we are satisfied that something is being done."

Calling someone "bald as a coot" is to compare him to the bald coot of Europe, a water bird whose bill extends well up into its forehead.

Hamburg youth exhibits grand champion steer

James R. Dietrich, Hamburg R1 (Berks County) exhibited the grand champion baby beef at the annual 4-H Steer Round-up held recently at the Leesport Auction. The youth's steer weighed in at 1225 lbs. and was sold to Edgar K. Black and Son for $.69 per pound.

A steer showed by Steve A. Bashore, Mohrsville R1, was selected as the reserve grand champion and was sold for $.56 per pound to T. M. Landis Inc., Mainland, Pa.

Both the grand and reserve animals were crossbred steers. A total of 34 animals were shown with the average selling price being $.49 per pound.

Results of the fitting and showing competitions were as follows:

Streams cleaned in Commonwealth

The Bureau of Water Quality Management of the Department of Environmental Resources reported today that from 1970 to 1974 there has been a net gain of 715 stream miles cleaned up in the Commonwealth.

Approximately 75 per cent of the State's streams meet quality standards which were established by the State and approved by the Federal government.

Controls have been provided for many of the point sources (sewage discharges, industrial waste discharges and storm or combined sewer discharges that are conveyed to a water body in pipe or channel). But most non-point sources (storm water runoff, drainage from abandoned mines and agriculatural runoff) still do not have controls.

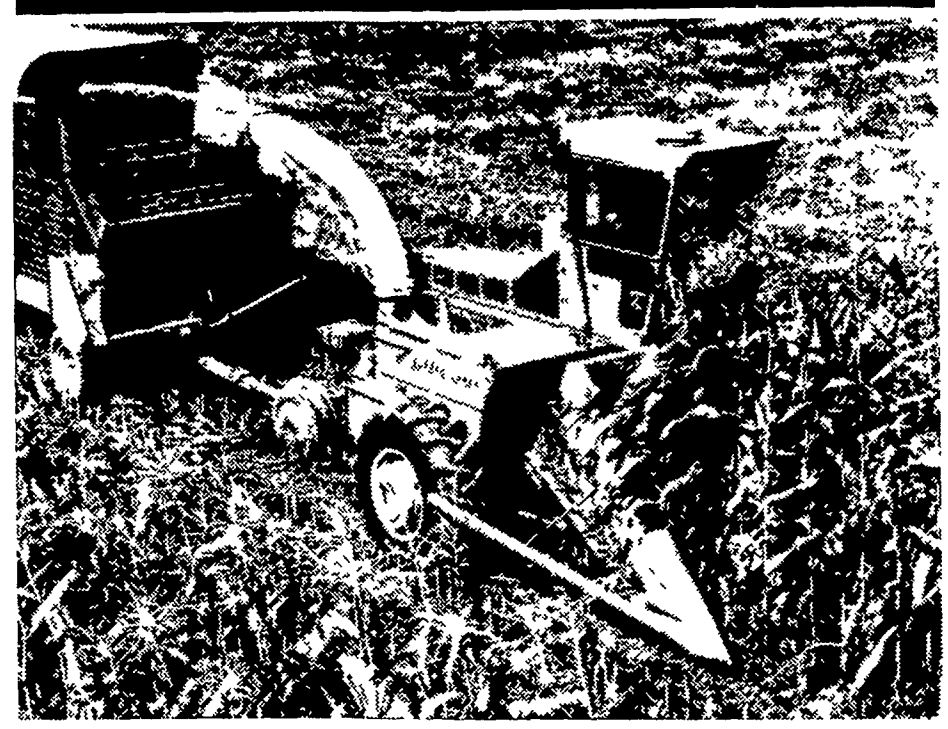
As estimate of the money needed to continue the cleanup work as well as specific information on designated stream segments is among the other information included in a Bureau report entitled "1975 Water Quality Inventory."

The report was issued in accordance with 1972 amendments to the Federal Water Pollution Control Act, and, a Bureau spokesman said, presents an opportunity to report to Congress and Pennsylvanians on progress made in water pollution control and the problems which remain.

In addition to chronic problems from point and non-point sources, problems of an acture nature are created by addition of substances to the State's waters through spills and accidents, most often related to storage or transport of materials.

Copies of the report are available from the Department of Environmental Resources, Bureau of Water Quality Management, Box 2036, Harrisburg, Pa. 17120.

New Idea's Uni-Forage Harvester



Superchopper
Reliable. A real performer.

Today there's a really dependable forage harvester in the field! It's the new generation of choppers from Uni-System, the No. 1 self-propelled forage harvester on the market.

We call it the Superchopper.

If you liked Uni choppers before, wait till you see this one in action. See its reliability . . . its added convenience . . . and yes, its 15% greater capacity.

Bigger, heftier cutterhead. Broader, wider design for even smoother flow of material.

Let us show you this great Superchopper. But before you buy, be sure you've got enough forage boxes to handle the greater volume.

AVCO NEW IDEA UNI-SYSTEM

BERKS COUNTY DHIA MONTHLY REPORT

Wernersville State Hospital's 63 head of registered and grade Holsteins have once again outproduced all others in the Berks County DHIA program by yielding an average of 1.98 pounds of butterfat per day, per cow. The herd of Andrew Stoltzfus followed in second place with a 1.84 average fat production per cow per day.

The highest individual record in 305 days was chalked up by "Sun," a six year old Holstein belonging to Reu Hel Farms Inc. Slippind into the second slot was "Flossie," a four year old in the William G. Howerter herd.

The following is the Berks County DHIA Report for the month of September, 1975. Only those herds averaging 1.5 pounds per day or over are listed·

Quality emphasized

WASHINGTON. - Fruit and vegetable processors may apply for grading services under a new "quality assurance program" established by the U.S. Department of Agriculture (USDA), effective Oct. 20.

The program is being adopted as was originally proposed in the Aug. 6 Federal Register, said officials of USDA's Agricultural Marketing Service (AMS).

Under the new program, a processor who has a quality control program meeting USDA requirements may grade his products using USDA inspection procedures and have the grade certified by USDA. To certify that the quality of the production meets U.S. grade standards, a USDA inspector will make daily verification inspections of some production lots and check the plant inspection and quality control records. Participating plants can use official grade marks, such as U.S. Grade A, along with a shield stating, "Packed under the Quality Assurance Program of the U.S. Department of Agriculture."

Processors interested in the program should get in touch with AMS' Fruit and Vegetable Division, Processed Products Standardization and Inspection Branch, Washington, D.C. 20250, or the Branch office nearest them.

Edwin C. Williams, Chief of the Processed Products Standardization and Inspection Branch, explained that a processor must complete a trail period after applying for the program. During this period, USDA personnel will evaluate quality control practices, plant sanitation, and the implementation of USDA inspection procedures.

A plant approved for participation is subject to ongoing USDA evaluation. In addition tot the daily verification inspections of production lots of a product, the USDA inspector will also make daily checks of plant sanitation. Use of the program may be withdrawn at any time of a plant fails to meet either inspection or sanitation requirements.

Regulations governing the inspection of processed fruits and vegetables are being revised to include the quality assurance program and are scheduled for publication in the Oct. 20 Federal Register.

All grading services for processed fruits and vegetables are coluntary and available on a fee-for-service basis.

Supervising right granted

WASHINGTON - State inspectors will be allowed for the first time to supervise the dipping of animals affected by or exposed to psoroptic cattle scabies, according to a proposal announced recently by the U.S. Department of Agriculture.

Only federal inspectors are permitted to supervise such dipping operations under exisitng rules, officials of USDA's Animal and Plant Health Inspection Service (APHIS) explained.

The public is being asked to comment on this and other proposed changes that would update and clarify present regulations designed to control psoroptic cattle scabies. Other proposed new provisions would:

-Set 10 days as the time limit for moving cattle interstate following inspection - an operating procedure long in effect.

-Require that when cattle move from infected and exposed premises, all "means of conveyance" and bills of lading carry the notation "cattle exposed to scabies."

-Substitute the words "means of conveyance" for the various words previously used to describe the vehicles used in transporting cattle.

-Certify cattle for shipment only when they have been dipped according to directions for permitted pesticides used, not, as previously, when regulations permitted dipping only once regardless of the kind of pesticides used.

Psoroptic cattle scabies - a costly skin disease affecting only cattle - is caused by tiny, parasitic mites that puncture the skin of cattle and feed on the body fluids released from the wounds. This causes the infested animals to lick, rub and scratch themselves to relieve the intense itching. Heavy infestations cause large crusty "scabs" to form on the skin; hence, the name "scabies."

Although the wholesomeness of the meat is not affected, the disease causes financial losses because the cattle gain weight more slowly and at the same time require more feed. Also, embargoes are often imposed by certain states on cattle shipments from infested areas, thus decreasing the number of markets available for feeder cattle.

Public suggestions concerning the proposed regulations should be submitted before Nov. 13, 1975, to the Deputy Administrator for Veterinary Services, APHIS, U.S. Department of Agriculture, Hyattsville, Md. 20782.

Tips for safer "Trick or Treating"

1. Costumes should be several inched off the ground to avoid tripping. Avoid long scarves or sashes that catch on bushes.

2. Choose light, bright colored costumes. A Dark witches costume should have fluorescent or reflective tape.

3. Children should carry white shopping bags to collect treats. Make sure "pirates" leave swords or sharp pointed objects at home.

4. Masks should fit good and holes correspond to the child's eyes. A safe alternative and fun, too, is cosmetics. For easy removal of makeup, first apply a thin layer of cold cream.

5. Carry a flashlight with new batteries.

6. Parents should accompany young children.

7. Trick and Treat in local area where children and homes are known.

8. Set a time limit. One hour is sufficient for children up to age 13.

9. Emphasize: Do not eat goodies until they get home. Examine everything received. Wash and cut fruit into small pieces.

1-row Superpicker... low cost way to harvest your corn

Hour after hour, acre after acre you'll get non-stop plug-free picking, in all kinds of corn with a 1-row Superpicker.

The big, hungry gathering unit picks clean, even in down and tangled corn. Flexi-Finger presser wheels on the long, 6-roll husking bed keep ears moving fast, even in the heaviest yields, and deliver clean, whole ears to your wagon.

Before you buy, take a good look at this Superpicker ... it combines the capacity you want with the non-stop performance you need for fast, clean, profitable corn harvesting.

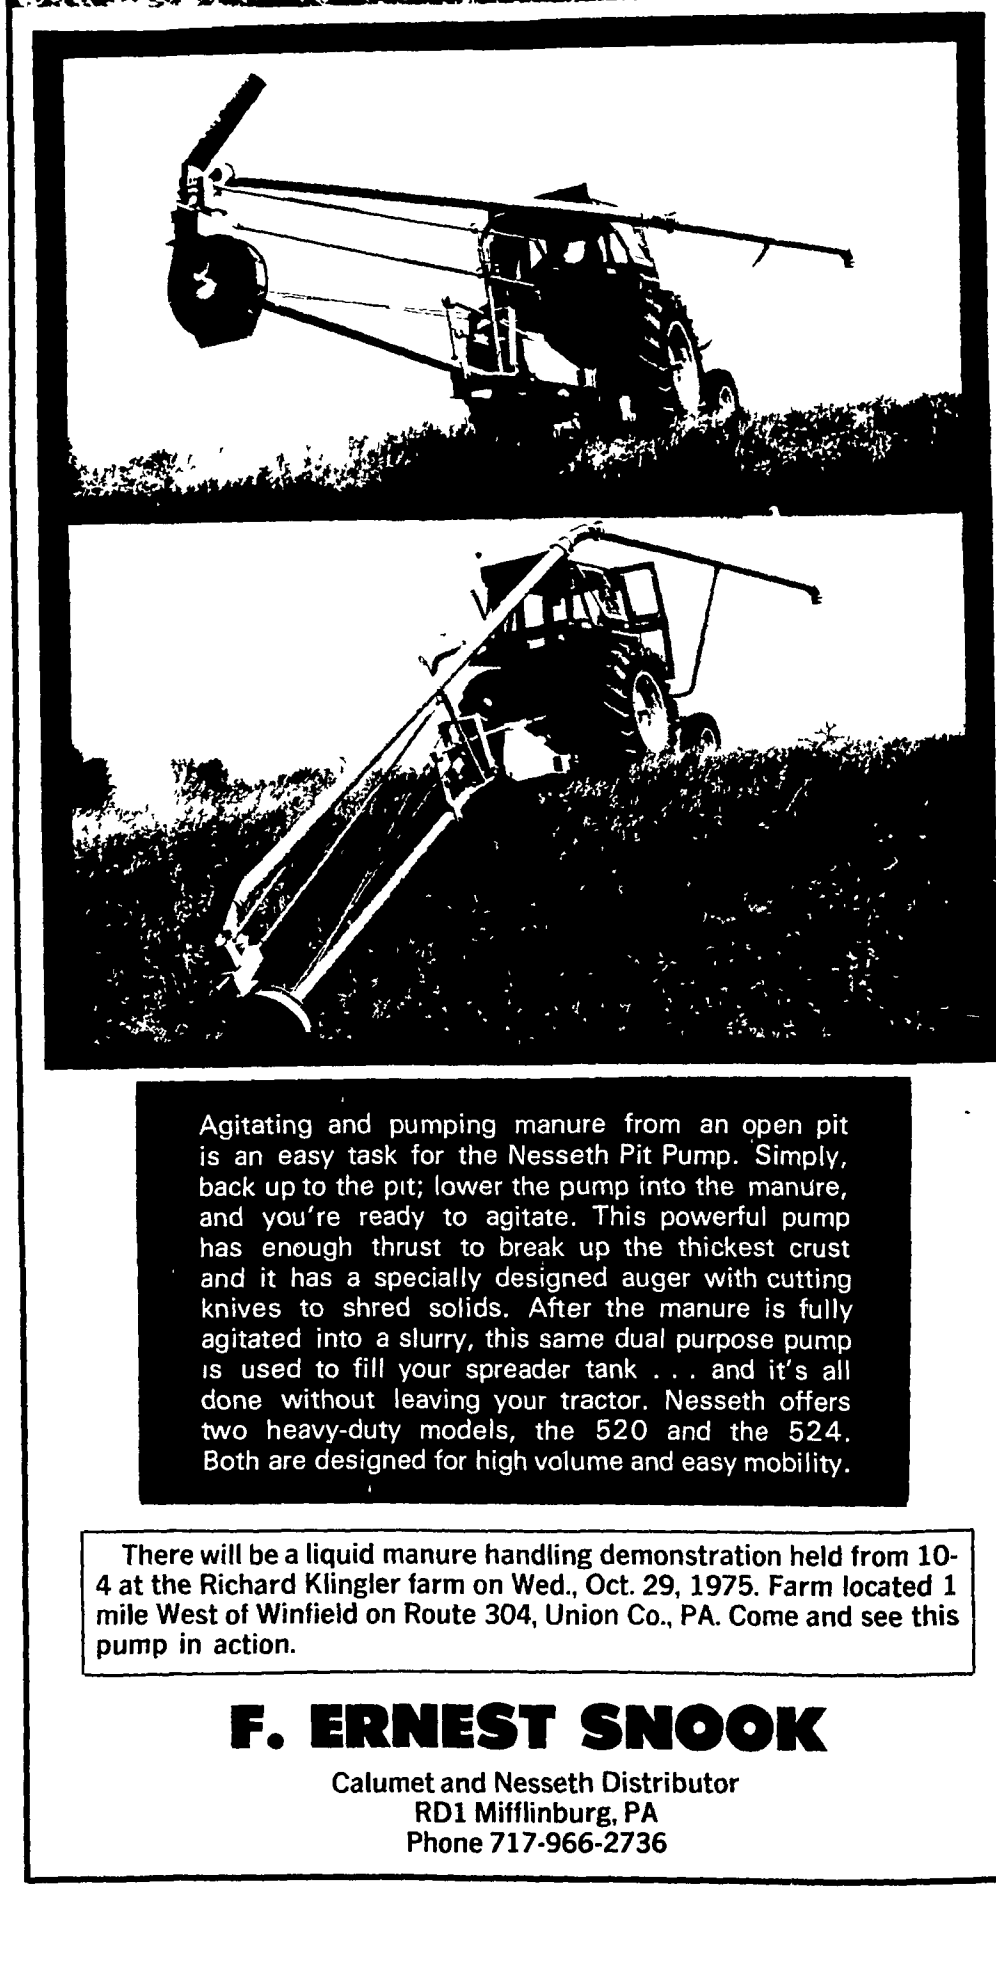
Nesseth PIT PUMP



Agitating and pumping manure from an open pit is an easy task for the Nesseth Pit Pump. Simply, back up to the pit; lower the pump into the manure, and you're ready to agitate. This powerful pump has enough thrust to break up the thickest crust and it has a specially designed auger with cutting knives to shred solids. After the manure is fully agitated into a slurry, this same dual purpose pump is used to fill your spreader tank . . . and it's all done without leaving your tractor. Nesseth offers two heavy-duty models, the 520 and the 524. Both are designed for high volume and easy mobility.

There will be a liquid manure handling demonstration held from 10-4 at the Richard Klingler farm on Wed., Oct. 29, 1975. Farm located 1 mile West of Winfield on Route 304, Union Co., PA. Come and see this pump in action.

Swine homes studied

This coming Tuesday, at 7:45 p.m., the Garden Spot Young-Adult Farmers will present an educational meeting on swine finishing houses. The purpose of the meetings will be to study the advantages and disadvantages of different facilities used to fatten swine. Colored slides and diagrams of each operation will be used to examine the different facilities. In addition, several of the swine producers who operate these facilities will be present to comment on the successes and problems encountered and to answer questions.

Some of the different housing systems to be studied are: total environment housing (with and without slats), Modified-open-front housing. Hog Hut System, Cargill Open-lot System, and a modular finishing unit. Results from previous research studies on rate of gain and feed conversion in different facilities will be available for study.

The meeting will be held in the agriculture classroom of the Garden Spot High School. Interested farmers and agribusinessmen are invited. Refreshments will be served.

Turtles Threatened

Three more species of sea turtles that ancient family of reptiles which lived in the days of the dinosaurs have been pushed closer to extinction because of increased development of coastal shorelines and overuse for commercial purposes The green (Chelonia mydas) loggerhead (Caretta caretta) and Pacific ridley (Lepidochelys olivacea) sea turtles have been proposed in the Federal Register to be added to the U S list of Threatened Wildlife

Shelf life of milk prolonged

COLLEGE PARK, Md. - Last fall (1974) the dairy science and agricultural engineering departments at the University of Maryland, here began research on a substitute process for pasteurization that may increase the shelf life of milk indefinitely.

This research was facilitated by a $24,000 grant from an equipment manufacturer, DASI Industries, Inc., of Silver Spring, Md.

Now the research is well under way. And University scientists are satisfied that the process of ultra-high (UHT) treatment with the patented DASI Free Falling Film heater has definite possibilities for prolonging the shelf life of milk without affecting its taste.

Heading the Maryland research team is Dr. Joseph F. Mattick of College Park, a professor of dairy science. His principal assistant is Dr. Dennis C. Westhoff of Beltsville, an associate professor in the same department. Both are Prince Georges county residents.

Installation of the equipment last fall and winter was supervised by Dr. Andrew M. Cowman of Frederick, a former associate professor of agricultural engineering at the College Park campus. Dr. Cowan is now employed by the U.S. Department of Agriculture at Beltsville, Md.

Dr. Mattick and Dr. Westhoff have been studying microbial counts, keeping quality and flavor of the milk.

Major questions which the research team raised at the onset of the project were: Does the equipment work? What do potential consumers think of the taste? Other questions have included: How does the new process affect the protein and other nutrients in milk? How does it affect cheese produced from UHT-treated milk.

Although the research is not fully completed, it appears that the technology involved does provide tremendous potential for future dairy processing operations.

Informal taste-panel tests of the UHT-treated milk began in September at the University's dairy sales room, located along U.S. highway 1 in College Park. They are conducted with drop-in customers each Tuesday afternoon under the supervision of Steven R. Framm, a first-year graduate student in food science.

Framm hails from North Bellmore, N.Y. He is a graduate of Nassau Community College and Penn State University.

The dairy sales room, site of the taste-testing, has long been famous for its ice cream, made on the premises with milk from Holstein and Guernsey cows at the nearby dairy barn on the College Park campus.

The UHT equipment has been installed in Turner laboratory, the University of Maryland's dairy science research facility in the rear of the dairy sales room at College Park. It represents an accumulation of 20 years of research in both the U.S. and Europe.

Earlier experimental UHT sterilizers have been operated in this country at both Michigan State University and the U.S. Department of Agriculture's Eastern regional research laboratory, formerly located in Washington D.C.

Equipment used in the other laboratories had problems in matching economic feasibility with production of milk that was both sterile and had good flavor. The Maryland equipment has changes in design which hold good promise of making the operation commercially feasible.

In recognition of its apparent promise, the Free-Falling Flim UHT heater being tested at the University of Maryland has earned for DASI Industries, Inc., a "Top Honors" citation in the fifth biennial Putman Food Awards competition for 1973-74.

The presentation to DASI officials was made on Oct. 14 at a University of Maryland "dairy press day" at the College Park campus. Making the presentation was Roy Hlavacek, editor of Food Processing, a Chicago-based trade magazine of the Putman Publishing Company.

Don't Freeze Everything

Certain foods should not be frozen, because their flavor or texture changes during the freezing process For example cooked egg white toughens, salad greens lose their crispness, raw tomatoes change their flavor and color and become limp and watery, raw apples and grapes become soft and mushy, fried foods tend to have a warmed-over taste when reheated

Legislation announced -

Milk can't be loss leader

HARRISBURG - The Pennsylvania Poultry Federation, with offices here in the state capital, announces the following legislative news which may have an affect on agriculture.

No loss leaders for milk . . Senate bill 1000 is an extensive milk regulatory bill, but includes a provision (for milk only) which says: "Any store offering to sell milk at retail for the consumption by the ultimate consumer, shall charge a markup of at least five per cent over and above cost." It continues by making it unlawful to use milk as a loss leader, either at cost or below the cost including processing, packaging, handling, hauling, sale and distribution.

Amendment to Unemployment Compensation Law ... House Bill 1634 amends the Unemployment Compensation Law to require that the employer give written notice to employees within five days who have become eligible, through mandatory retirement or otherwise, for benefits under this act. The employee must sign the statement and return it to the employer.

Increase in Fuel Excise Tax ... House Bill 1720 increases the fuel excise tax from eight cents (.08) to eleven cents (.11) on all dealer-users of fuel in the Commonwealth. The bill does not change the agricultural exemption and has passed the second reading in the House. HB 1721 provides the same changes but required one cent per gallon of the tax to be used for the maintenance and surfacing of secondary roads.

Vehicle Registration Fees ... House Bill 1723 will increase motor vehicle registration fees. The bill has a variety of changes including exemptions for persons 65 years of age, handicapped veterans, new passenger vehicle rate of $28.00, and new rate schedules for buses and trucks, etc. If anyone is interested in the new truck schedule, contact PPF.

DER Must Act In 30 Days ... House Bill 1744 would require the Department of Environmental Resources to act within 30 days on any grant, applications for permits, licenses, registrations, renewals, etc. under any law or regulation administered by the DER. Failure to do so shall be demmed a grant of approval.

Tougher Weighing and Measuring Law ... Senate Bill 1044 established the "Dealers and Repairmen of Weighing and Measuring Devices Registration Act." The act will require certification and registration of dealers and repairmen; reports of sales (installation) or repair within 48 hours; maintaining records with specified information available for inspection and submission of calibration testing equipment for inspection every 2 years.

Salvaging Pennsylvania Railroads ... Senate Bill 640 would permit the Commonwealth of Pennsylvania to go into partnership with the federal government as a means of saving some railroad lines.

THE AMERICAN MICHELIN WANTS YOU

WE GUARANTEE OUR WORK

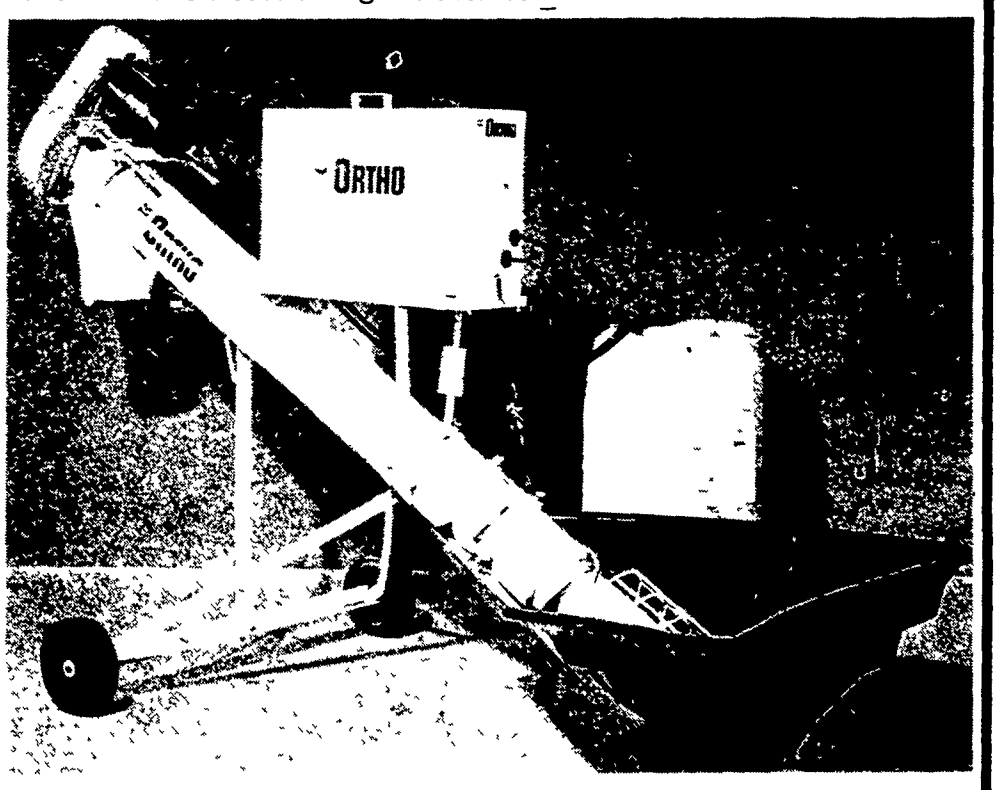
ORTHO-GUARD™
A TOTAL APPROACH TO TREATING AND STORING HIGH-MOISTURE FEED GRAIN.
ORTHO GRAIN PRESERVATIVE

+ Reduces the need for air tight storage.
+ Protects grain quality and feed value.
+ Used on the farm for 4 years.

Ortho Grain Preservative offers a practical way of cashing in on the advantages of harvesting and storing high mositure feed grains.

Ortho Grain Preservative lets you move your crop directly from the field to storage where it gets a chemical coating of protection before it goes into conventional buildings.

The result: there's no need to tie up huge amounts of capital in drying equipment or sealed silos. Grain that's treated according to label directions resist spoilage for up to 12 months when stored in metal bins, wood cribs and similar low cost storage structures.



Unit available on rental basis or can be purchased.

Treats up to 900 bushel per hour, depending on moisture content of grain

See or call us for complete information on Ortho-Guard™ and applicator.

Co-op council hits FTC report as a raw deal for farmers

WASHINGTON - The National Council of Farmer Cooperatives said last week that a recent Federal Trade Commission (FTC) report on agricultural cooperatives was a raw deal for farmers, and dosen't contributute to an understanding of the issues related to agricultural cooperatives.

National Council President Kenneth D. Naden said in a letter to FTC Chairman Lewis Engman that because of the "bias and preconceived conclusions" of its authors, the report shows a fundamental lack of knowledge about farm price formation, marketing costs and margins, and market power as it is used in the food industry.

The FTC report, issued on September 30, was critical of marketing orders and cooperatives which appear to dominate certain agricultural commodity areas.

Naden emphasied that issuance of the report at this time makes farmers and their marketing cooperatives the victims of an act of deception and bad faith by the FTC staff.

To back up his charge, Naden noted that 50 large agricultural marketing cooperatives were contacted last February by the FTC's Bureau of Competition for extensive business records dating back to 1970. He said cooperative officals were assured at that time that the material would be a major resource for a comprehensive analysis of the role of agricultural cooperatives in marketing farm products.

"We do not find any evidence that any of the material furnshied by these organizations was used by the authors in preparing the report issued on September 30, "Naden delcared. He then cited the case of one cooperative official who learned on October 2 that the package of material he sent to the FTC had not yet been opened.

Naden said these events all led him to conclude that the authors of the FTC staff report "had their preconceived conclusions established before the material he sent to the FTC had not yet been opened."

Pesticide hearings set

WASHINGTON - A Senate Agriculture subcommittee will hear testimony next week on legislation to extend for one year the basic authority for Federal regulation of pesticides and related chemicals.

The Subcommittee on Agricultural Research and General Legislation, chaired by Senator Jim Allen, will hold hearings at 9 a.m. Tuesday, October 28, and 9:30 a.m. Wednesday, October 29, on H.R. 8841, which passed the House earlier in October.

The bill would extend for one year authority for appropriations to administer the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) which expires November 15, and make several substantive changes in the law, the Alabama Senator explained.

Among the House-approved amendments to the Act are authorization of the Administrator of Environmental Protection Agency to require that farmers take instruction in application of pesticides before they can certify themselves to be approved applicators and a requirement that the EPA consult and consider the views of the Secretary of Agriculture before prohibiting the use or manufacture of pesticides.

Senator Allen's subcommittee held hearings May 20 on a Senate bill to extend FIFRA for two years, but no action was taken.

"It is necessary to hold additional hearings to examine the changes made by the House in legislation which would have provided a simple extension, and to review once again EPA's attitude toward the American farmers and our food production system," Senator Allen said.

"It is encouraging that EPA's officials and staff have begun showing greater understanding of the problems of American agriculture and food production since congressional hearings have directed some hard questions at their past practices," he said, "and it is my hope that two more mornings of hearings can accelerate that process of understanding."

The hearings will be held in Room 325, Russell Senate Office Building. Witnesses will be limited to 10 minutes oral presentation, but longer statements may be submitted for the record.

Cattle increased

HARRISBURG - Pennsylvania cattle on feed for slaughter market as of October 1 has increased over last year, according to the Pennsylvania Crop Reporting Service.

There were 60,000 cattle and calves on feed which represents an increase of 12,000 head or 25 percent above a year ago.

Marketing of fed cattle during the July-September quarter at 33,000 were three percent or 1,000 head more than were marketed during the same period in 1974. There were 35,000 head placed on feed during the quarter, 40 percent or 10,000 head more than the same period a year ago. Expected marketings of fed cattle, during the October-December quarter at 25,000 would be four percent or 1,000 head fewer than were marketed during the same period in 1974.

In the 23 major cattle feeding states, cattle and calves on feed October 1 for slaughter market totaled 9,301,000 head. This is two percent or 149,000 head more than a year ago. Placements of cattle and calves on feed during the July-September quarter totaled 6,029,000, a 22 percent increase from 1974.

Marketings of fed cattle for slaughter during the July-September quarter totaled 5,018,000 head, down nine percent from 1974 and 16 percent from the same quarter in 1973.

Hay taken from median strips

Farmers and ranchers who are short of hay or want low-cost forage might consider harvesting forage from along highways and median strips. Studies by the Agricultural Research Service of the U.S. Department of Agriculture show that adding fertilizer to these areas produces up to three times more forage than similar unfertilized areas.

Other advantages of using this forage are also forseen by ARS scientists. Scenery is improved for motorists because the fertilizer keeps roadiseds greener, longer into the summer. Harvesting the forage would save County and State highway departments time and money spent mowing the right-of-way.

Snow often blocks highways where uncut grass from the preceding summer acts as a natural snowfence for drifting snow. Removing this grass allows the snow to blow across the road rather than collecting on it. Harvesting the hay also cuts down on fires. Harvesting is especially important now that new cars are equipped with catalytic converters. These devices get extremely hot and can start fires if a car is driven onto dry, tall grass areas.

ARS started the research by selecting several plots, ranging in size from 16 by 50 feet to 50 by 104 feet in medians and roadsides along Interstate 90, west of Gillette, Wyo. The fertilized plots received 80 pounds of nitrogen per acre as ammonium nitrate, and 56 pounds of phosphorous per acre while others served as checks and received none. Fertilized plots produced an average of 11,762 pounds of forage per acre at 12 percent moisture An average of only 639 pounds of forage per acre was harvested from unfertilized plots.

Range scientists Frank Rauzi, says "Much more forage was harvested from areas closest to the highway than areas further away, 2,241 pounds per acre versus 1,306. The rain ran off the imprevious surface of the highway and provided more mositure for forage closest to the highway."

Crested wheatgrass was the dominant species with some alfalfa, yellow blossom sweet clover, and miscellaneuos grasses and forbs. Wheatgrass was the dominant plant closest to the highway.

Conducted cooperatively with the Wyoming State Highway Department, Cheyene, and the Wyoming Agricultural Experiment Station, Gillette, the research shows that crude protein of crested wheatgrass increased from 8.4 percent on unfertilized areas to 11.4 percent on fertilized areas. The calcium and phosphorous levels in both fertilized forage were adequate for livestock nutrition.

Soil textures of medians and roadsides varied considerably because of mixing caused during road construction. Some were clays, others loams and sandy loams. Soil acidity (pH) was nearly neutral on all soils except where weathered coal was mixed with the soil fill.

Precipitation during May and June was about 2-¾ inches, approximately 2-½ inches below average. Had it been average or above, forage yields would have been greater.

Anyone wishing to utilize this unused resource should first check with local highway departments and secure a permit, if required.

Pesticide curbs viewed as peril to food supply

WASHINGTON, D.C. - An agricultural scientist and author said last week that food production will be greatly jeopardized and food shortages are almost certain to occur in the United States "if regulatory officials continue to demand more and more picayunish research."

Dr. Keith C. Barrons, author of the new book "The Food in Your Future" and a development scientist with Dow Chemical Company, said the present regulatory system "threatens to become a bureaucratic monster."

Barrons spoke at the annual meeting of the Agricultural Research Institute. He is a former president of the institute, a current board member of the Council for Agricultural Science and Technology, and has served on a number of committees of the National Academy of Sciences.

"If over-regulation eliminates many of our chemical tools and blocks extended uses of those remaining, research that could help make the next century a time of continuing food abundance will dry-up wither on the vine," Barrons said.

"We have already seen some disturbing evidence of this withering. Is the ultimate price tag on safety-any-cost the greatest cost of all; that is, a shortage of food?

The Michigan scientist called for "a public reappraisal of what constitutes practical safety and a rethinking of the regulations that are needed to achieve this goal."

LIFE on the farm

By Dieter Krieg

Sitting in the shed, the corn picker looks dead. In action, out in the field, it is deadly.

It all starts with the power-take-off shaft, which transfers power from the tractor to the picker. The rotating motion of the shaft is mechanically transformed into other types of motion, until the entire machine vibrates and hums with activity.

Some parts move up and down, others from side to side. Most moving components spin on axles — and they do so with amazing speed. That's where the danger comes in.

Every year lives are lost because the operator of the machine neglected to turn the power off while making adjustments, repairs, or removing debris from around the snapping rolls. The speedy chains and rolls can't tell the difference between ears of corn and a man's hand.

The snapping rolls travel at a speed of 12 feet per second. Unfortunately, too many men have tested the accuracy of that statement by ignoring the warning printed in several places on the picker: "Keep Hands and Feet Away From Moving Parts, Turn the Machine Off Before Attempting to Make Repairs . . ."

A man's reflexes aren't fast enough to compete with the speed of the machine.

While the picker's countless moving parts are dangerous, they are also beautiful in the way they all work together to perform the job.

The orchestrated movements come close to beating out their own symphony. There are the spinning gears and rolls; the racing and clattering chains; the humming blower; and the snapping, crackling noises of corn as it tumbles along its path to the wagon behind.

The wind provides its effect as it whistles through the remaining stalks in the field. Even the tractor has a part in this outdoor orchestra. The sound of the engine is somewhere between a roar and a hum. Its rear wheels create crunching sounds as stripped corn stalks are crushed beneath them

Amidst the ever-present noises of the corn-picker and tractor, and the dust which accompanies the job, the farmer continues his work until sundown — often perfectly silhouetted against the huge, red-orange autumn sky

Fire warning issued

The Department of Environmental Resources, Bureau of Forestry, is cautioning motorists with 1975 cars equipped with catalytic converters that studies have revealed that the converters can cause grass and forest fires.

Under normal operating conditions, exhaust gas temperatures are significantly increased within the converter for the purpose of reducing the engine's chemical emissions. The skin temperatures of converters have been reported as ranging from 800 degrees F to 1200 degrees F, depending on the type of converter. Malfunctioning engines, out of tune engines, or vehicles under a strain such as towing or going up a grade, can result in very high converter temperatures because of an increase in unburned fuel reaching the catalyst. When this occurs, temperatures may go above 2500 degrees F, twice the temperature of a lighted cigarette. In addition, reports indicate that when catalytic converters reach these extreme temperatures, components are sometimes expelled through the tail pipe, exiting at temperatures around 2000 degrees F.

These temperatures are potential fire hazards and may start grass and brush fires. Dry grass and dry pine needles begin burning at temperatures between 700 degrees F to 800 degrees F. Contact time for ignition decreases dramatically in the 900 degree F to 1100 degree F range with almost instantaneous ignition occurring between 1000 degrees F and 1100 degrees F.

With the upcoming hunting season, 1975 cars may become quite a problem as hunters park their cars in grass fields or sit and idle their vehicles in high grass areas, or drive through these areas. Owners of 1975 vehicles should be made aware of this potential fire danger to prevent grass and forest fires, damage to their vehicles, and injury to themselves. Care should be taken when parking off the road and making sure the vehicle is operating properly.

Under Pennsylvania laws, a person responsible for starting a forest fire is liable for the cost of extinguishing the fire and the damage it causes. This pertains to fires started accidentally as well as those started on purpose.

Good records needed

Form A to Z, whatever the small business, the Internal Revenue Service points out there's a common characteristic to almost evey successful enterprise - good records. According to the IRS, good records are important to the success of a business because they:

-help keep track of profits

-help determine depreciation allowances and enable the businessperson to get full tax deductions

-show which business income is taxable and which may not be taxable

-susbtantiate information provided on tax forms and help answer a tax examiner's questions during and IRS audit

-establish reportable earnings for social security purposes.

Business records need not follow any particular form to meet IRS requirements, as long as the records clearly establish all income, deductions, and credits. The Internal Revenue Service is ready to assist persons operating small businessesses and to provide free pamphlets covering a variety of business topics.

Innocent!

A soft-spoken witness insisted on directing his testimony to the prosecutor, making it hard for the members of the jury to hear him "Will the witness please speak to the jury'" the judge finally ordered

Turning, the witness looked the jury over, nodded affably, and said brightly "Howdy'"

Charolais show honors breeder

TIMONIUM, Md. - More than 200 entries from leading Charolais breeding establishments throughout the United States have been received for the 7th National Charolais Show, which will be held at the Eastern National Livestock Show in Timonium Nov. 3.

The show, described as the Hallmark of Charolais breeding cattle presentations, will be conducted in memory of the late Fenwick Keyser of Reistertown, Md., one of the early enthusiasts of Charolais in the U.S. and a pioneer Charolais breeder in the New England Area.

Keyser's influence on Charolais also was felt internationally. He was one of the leading proponents and organizers of the International Federation of Charolais which today contains representation of Charolias registries in nearly 40 countries around the world. He received the Agriculture Merit Award from the government of France in 1966, becoming one of the first Americans to receive that recognition.

In the United States he served three terms as a member of the board of directors of the American-

Fenwick Keyser

Internatinal Charolais Assn., of Houston, Tex., the breed registry in the United States. The breed today is the fourth largest in the nation.

He also was the organizer and the first president of what today is the Colonial Charolais Assn, and organization of Carolais breeders in the New England area and one of the stronger local promotional groups of breeders in the U.S. He died unexpectedly in Italy July 25, 1968.

His widow, Mrs. Barbara Keyser, who continues to reside on the family farm at Reistertown, and members of their family, have been invited to be special guests at the show.

Judge for this seventh national presentation of Charolais will be Dr. Harlan Ritchie of Michigan State University.

Individual classes will contain equal numbers of entries, marking the first time that pre-set age groups has not been followed in the National Show. When all entries are obtained, classes will be broken at equal age brackets, with seven classes set for females and eleven bull classes.

All cattle will be weighed prior to show day, and that weight plus the date of birth placed on the exhibitor's card for information to the judge and spectators.

One of the highlights of the National Charolais Show is the awarding of the AICA's Travelling Challenge Trophy. This trophy is awarded to the exhibitor whose entries accumulate the most points at the show, and is returned for presentation the following year. When an exhibitor wins the trophy three times, it becomes his permanent possession.

Entries at the show also earn points for their sires toward inclusion in the association's Roll of Excellence. These also are on a point basis, and a sire must accumulate 200 points from placings of his progeny before he can be included on that Roll.

The show will culminate three days of special activities for Charolais at the Eastern National. The activities get underway Saturday, Nov. 1, with the Eastern National's traditional Colonial Ball at the Eagles Nest Country Club, Phoenix, Md.

Members of the Colonial Charolais Assn. will conduct their annual membership meeting, Sunday, Nov. 2 at the Hunt Valley Inn, followed that evening by the Eastern National Charolais Sale at the fairgrounds in Tomonium. Consigned for the sale are approximately 40 head of Full French, domestic and Polled Charolais breeding animals. Sale manager is C. C. 'Buzz' Garey, Morristown, Pa.

The show begins at 9:30 a.m. Nov. 3, and will be closed with a cocktail party sponsored by the Colonial Charolais Assn in the association's hospitality barn to be set up in the judging arena.

Stoneback triumphs

Approximately twenty 4-H members from Chester and Delaware Counties braved the gusty weather to participate in the Chester County 4-H Goat Show. Barbara Csala, Rising Sun, Md. was the official judge.

Richard Stoneback, Oxford acquired four championship ribbons for his efforts. In addition to exhibiting the Grand Champion goat, he was also judged top showman. Ricky also showed the Reserve Grand Champion and the Junior Champion goats. Ricky was also the first-place senior fitter.

Top fitter of the show was Tim Ireland, a first-year member from Chester Springs.

The Reserve Junior Champion goat was exhibited by Rachel Weinstock, Phoenixville. Rachel also exhibited a first place two-year-old milker.

The first-place winners in other classes were: junior doe kid - Janet Goldhahn, Boothwyn; first-year showmanship - Julie Meliodon, Gradyville; and junior fitting and junior showmanship - Teresa Wensel, Linfield.

Columbia producer exhibits champions

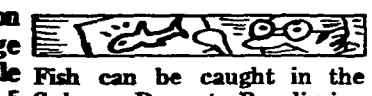
VINTAGE - John Good, a Charloais breeder from Columbia R1, captured three top prizes at the annual Charolais Cattle Show held Oct. 17 at the Vintage Sales Stables.

Good exhibited the first and second place pen of five cattle in the feeder cattle class and also took first in the feeder calf competition.

Anna Ubmle, Cochranville, exhibited the second place animals in the calf competition. Trophies were awarded to both the producers.

Judge for the event was Loren Conner, manager of Mal-Allen Farms in Rahns, Pa.

Following the judgind the cattle went on the auction block with the average falling at $.42. The cattle were judged in groups of 5 with no individual placings. Harold Hess, Vintages Sales was in charge of the event.



Fish can be caught in the Sahara Desert. By digging through the sand to underground streams fishermen can obtain fresh-water fish.

Tax benefit offered

Small business operators generally have a great deal to worry about, including taxes. To help lighten this burden, the Internal Revenue Service offers free publications designed to answer a small businessperson's tax questions.

Available by calling or visiting an IRS office is the most popular handout - IRS Publication 454, "Your Business Tax Kit," a folder-type packet which includes tax forms, instructions, answers to common questions, and other material pertinent to the taxes and reports applicable to a business. A checklist of some of the Federal taxes that a sole proprietor, partnership, or corporation may be liable to pay is also included. Featured on the back of a kit is a tax calendar, listing deadlines for filing various types of returns, for issuing wage and tax statements to employees, and for making Federal Tax Deposits.

Some of the other free business-oriented publications available include the "Tax Guide for Small Business," IRS Publication 334, which explains in considerable detail how the Federal tax laws apply to sole proprietorships, partnerships, and corporations. This comprehensive, 192-page publication includes a discussion of recent developments in the tax laws that may affect a business, as well as a section on IRS uadit of returns and appeal rights.

Also featured in Publication 334 is a checklist of commonly used forms, including a sample of various forms already filled in, a checklist of some of the taxes for which a businessperson may be liable.

Written very much in the same vein with similar types of features is the Farmers Tax Guide, IRS Publication 225, geared to the special tax problems and situations of farmers as well as those engaged in commercial fishing. The 64-page publication is also available without charge, either by visiting or calling as IRS office.

There are a number of other free pamphlets of interest to businesspeople available from the IRS. These cover such topics as "Losses from Operating a Business," "Tax Information on Accounting Periods and Methods." "Recordkeeping Requirements and a Guide to Tax Publications," "Tax Information on Partnership Income and Losses," and more. However, for the individual looking for a handy, up-to-date, and comprehensive compilation of business-related tax information, the IRS suggests Publication 334 which covers just about everything there is to know.

In addition to the wide array of publications, the IRS is also ready to provide year-round assistance to businesspeople either at an IRS office or on the phone should the taxpayer be some distance away from an office or find it inconvenient to make a visit. And for most taxpayers, a call to the IRS over its toll-free telephone networks costs nothing more than the price of a local telephone call.

Tax assistance from the IRS can run the gamut form, as an example, the specialized recordkeeping requirements that might be advisable for, perhaps someone opening a new pizza parlor in town to the best way, taxwise, for a clothing store operator to depreciate the mannequins. Most important, the IRS is ready to chip when a taxpayer anticipates having tax problems; such as not being able to meet the deadline for deposit of quarterly employment taxes. In this connection, the IRS always advises the businessperson who anticipates tax difficulties to contact the IRS before, not after, problems develop. Very often solutions or alternatives can be worked out satisfactory both to the IRS and to the owner of the business - the alternative, of course, is to be a delinquent taxpayer with all of its enduing problems.

Given the problems of merchandising, advertising recruiting and hiring, employee relations, labor unions, purchasing equipment and the like, it's not an easy job these days to operate a business. Yet, at least when it comes to tax matters, help is as near as the IRS.

Potassium

One of the most crucial functions of potassium is to help maintain a regular heart beat A potassium deficiency can induce an erratic heart beat as the cardiac muscle is deprived of this regulator Potassium also aids in the transfer of cellular energy—allowing muscles to contract, nerve impulses to be sent food to metabolize, and other vital processes to be performed

Direct marketing proposed

HARRISBURG - Pennsylvania Agriculture Secretary Jim McHale this week reported that the National Association of State Departments of Agriculture (NASDA) has endorsed an amendment to a direct marketing bill that would include funds for state departments of agriculture.

McHale, who is first vice president of NASDA, said the organization favors direct sales from farmers to consumers because this would "improve the condition of and financial returns to farmers."

The amendment backed by NASDA was offered by Congressman Geroge E. Brown of California. It amends House Resolution 7488, authored by Pennsylvania Congressman Joseph Vigorito, to provide funds for state departments of agriculture to initiate, encourage, develop and coordinate methods of direct marketing of various agricultural commodities from farmers to consumers.

Vigorito's bill, which McHale backed several months ago, authorizes an appropriation of $2.5 million per year for three years for agencies within the United States Department of Agriculture to survey and foster innovative arrangements between farmers and consumers.

The bill also provides for the Extension Service of USDA to work with the state agriculture deaprtments in giving techincal and other assistance for the establishment and operation of direct marketing arrangements.

"The Pennsylvania Agriculture Department has already set into motion projects to build more direct channels from farmers to consumers, noted McHale. "The Vigorito bill, with a provision for funding as contained in the Brown amendment, would tie in well with our efforts to improve farm income through direct marketing," said McHale.

Why you should add

THE EFFICIENCY FACTOR

to your feeding program

With feed at 5¢ per pound and cattle selling at 35¢ a pound, an investment of less than $1.00 per head for AUREO S 700 and AUREOMYCIN® returned $5.75 in five commercial trials.

When cattle arrive at your feedlot they've been stressed and exposed to a variety of disease organisms Start them with a conditioning feed containing AUREO S 700 and feed it for the first 28 days AUREO S 700 maintains weight gains in the presence of shipping fever

Then follow up with feeds containing AUREOMYCIN chlortetracycline AUREOMYCIN not only provides for excellent growth and feed efficiency but also helps reduce losses from liver abscesses foot rot and bacterial diarrhea

For complete details contact any of the feed manufacturers listed below or call or write The Fox Company

What's New . . .

Portable Building

ALLIANCE, Ohio - A complete line of portable livestock buildings with the Universal brand name is now available through local farm supply cooperatives, according to an announcement by W. J. Brooks, Director of the Manufacturing Division of Universal Cooperatives of Alliance, Ohio. The new buildings - to be marketed as Calf Lodge, Pig Lodge, Sow Lodge, and Hog Lodge - will be manufactured at the company's Star Agri Products Division plants near Goshen, Indiana.

Included in the new building line are nursery buildings for baby pigs and calves, farrowing buildings for sows, and a large hog finishing structure. The new Universal Lodge buildings are available in 12 or 24-foot widths and in lengths from 24 to 50 -feet. The largest Lodge unit is a 24 by 50-foot structure, which is delivered in two sections and is assembled on the farm site. Assembly usually takes one day.

The buildings are delivered by flat ben truck and installed in any convenient location selected by the livestock producer. The producer needs only to supply a four-inch-thick concrete slab, plus water and electrical hookups. Each building comes complete with feeders, waterers, pens, heaters, ventilation equipment, slotted flooring, and lights. Every Lodge has a built-in manure pit large enough for long intervals between emptyings.

Weeding Tips

A new free bulletin is now available from Stauffer Chemical Company describing the use of Eradicane corn herbicide for control of johnsongrass seedlings, nutsedge, bermudagrass, quackgrass and several other grass and broadleaf weeds, including wild cane. Eradicane is a short lived herbicide and leaves no carryover residue to harm rotational crops.

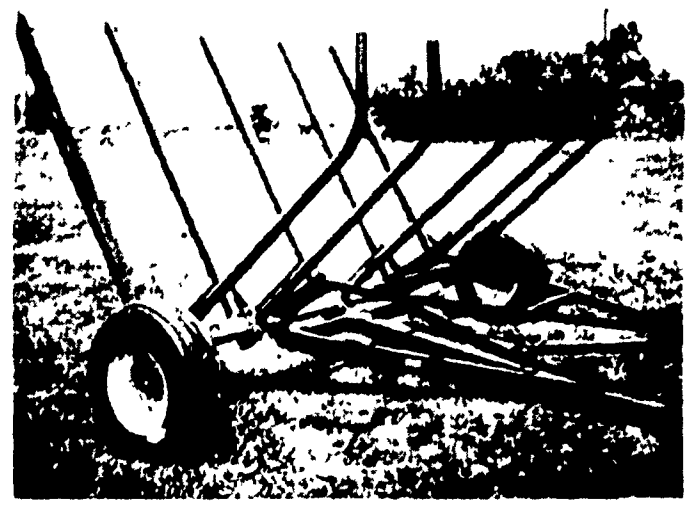
The bulletin explains how proper preparation of the soil is essential for optimum control with Eradicane. Working the soil so that it is in good tilth, chopping the rhizomes up into 3 or 4 inch pieces and using the proper tools for discing will aid in control of johnsongrass.

The bulletin also includes a map illustrating the distribution of johnsongrass throughout the country.

For your copy of Eradicane bulletin No. FS-0537, write: Stauffer Chemical Company, Agricultural Chemical Division, Dept. KP, Westport, Conn. 06880.

Avoid Clutter

Planned storage can help cut down on the clutter or disorder of children's toys Large toys puzzles. books. and records fit well on open shelves Baskets and cartons are fine for miniature animals wooden blocks or marbles Shoe boxes. with a picture pasted on the side illustrating the contents. provide extra storage



Hay Mover

A new hay mover from Best-Way, Inc. will move large hay stacks or two round bales without using a 3-point hitch.

Designated Li'l Grabber No. 200, the new mover utilizes a 10-inch hydraulic cylinder to supply power to lift large amounts of hay. The Li'l Grabber will enable farmers to move hay with any tractor or vehicle equipped with a hydraulic system.

The new mover is constructed with two sets of five grabbing arms, set 90 degrees apart, which are lowered hydraulically to pick up hay. After pick-up they raise to a 45 degree angle with the ground for hauling. This hauling angle ensures safe moving with a minimum of spillage over an terrian, in any weather. The unit hitches to the rear of tractors or any vehicles for easy pick-up and fast hauling.

The introduction of the Li'l Grabber No. 200 marks Best-Way's first entry into the haying equipment market. Best-Way, Inc. is currently a nationally known manufacturer of agricultural spraying equipment headquartered in Clear Lake, Iowa.

For more information on the new Li'l Grabber No. 200, contact Best-Way, Inc. Box 22, 2006 7th Avenue, Clear Lake, Iowa 50428.

New grind-and-mix supplement as special as your horses.

New Wayne Pro-Pel turns a ho-hum grind-and-mix feed into a tailor-made ration for your horses.

Simply add these fortified pellets to your grain and roughage and you'll see the difference in robust health and vigor. Horses respond because Pro-Pel feeding matches the special needs of their single-stomach digestive systems - unique among roughage-eating domestic animals. (Supplements designed for cattle simply aren't suited for horses.)

In Pro-Pel, you provide high protein plus needed minerals and vitamins - all in readily digested form.

See the real difference in animal vigor when you switch to this new supplement. Ask your Wayne Dealer for Pro-Pel pellets - for your mixing or his. If you don't know who he is, write Allied Mills, Inc, 110 North Wacker Drive, Chicago, IL 60606.

Your Wayne Dealer cares. That's what makes the difference.

CHEEP!

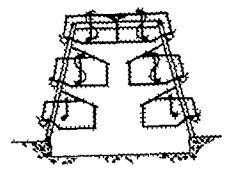
CHEAP? NO. ECONOMICAL? YES. SAVINGS ARE WHAT KEENCO STARTER-GROWER SYSTEMS ARE ALL ABOUT. SAVINGS IN DOLLARS. AND IN TIME.

Grow your own pullets and save up to 50¢ a bird. Or, convert your floor operation and save a pound or more of feed per bird. At today's prices, that ain't chicken feed.

Keenco 2 and 3 high cage systems are fully automated. That means you spend fewer hours doing unproductive labor, have more time for management. You get dollar-saving feed conversion, healthier birds, more uniform flocks time after time. And you end up with more productive layers because they've grown up in, and are accustomed to, a cage environment.

Keenco's Zoned Heating takes the sting out of the energy crunch. You can put three to four times more birds in your old floor house—and use less fuel.

All this plus Diamond Automation's **Total Help** Program. Help in converting your old-fashioned floor brooding operation. Help with planning. With selecting the right equipment. Installing it. Financing it. Operating it more profitably.



Keenco 3 High Starter-Grower System. 2 High Systems also available.

Farm organizations from more than 50 countries to meet in Washington

WASHINGTON - Organized farmers from some fifty nations will coverge here later this month for a ten-day meeting dealing with world food policy, the agricultural aspects of the multilateral trade negotiations, national and international food reserves, farm commodity situations and problems, and the role of agriculture in sustaining a livable environment.

These are among many issues to be considered when the International Federation of Agricultural Producers (IFAP) holds its 21st General Conference October 27 through November 6 at the Statler Hilton hotel.

This is the first time that the global farm association has held a General Conference in Washington, D.C. and only the second time it has met in the U.S. in its 30-year history.

"If the world will listen, farmers can present some workable solutions to problems associated with famine, hunger, world trade and agricultural progress in the developing countries," Charles G. Munro, a dairy farmer from London, Ontario, who heads IFAP, believes. "Farmers are, in fact, far ahead of their governments in reaching a consensus on a sensible course in food policy."

Munro's own report on the "state of world agriculture" will come at plenary session on October 29, at which Dr. Addeke H. Boerma, Director-General of the United Nations Food and Agriculture Organization (FAO), U.S. Senator Hubert H. Humphrey, IFAP Secretary-General M.P. Cracknell, spokesmen for the U N World Bank, the U.S. State Department, and participating U.N. specialized agencies will speak.

The principal business of the IFAP conference will take place in its plenary and policy committee sessions at which the recommendations of the organization for the coming year will be developed.

However, significant discussions will also take place in commodity group discussions, in standing committees on agricultural cooperation and on agriculture in the developing countries, and in special policy sessions on the environment, farm contracts and bargaining and agricultural finance.

A special session on International Women's Year (IWY) on November 6 will feature Margaret Bruce, Deputy Secretary-General of the U.N.'s IWY conference, and Dr. Isable Chaly Caserta, Executive Secretary of the Inter-American Commission on Women.

Egg producers to vote

WASHINGTON, - Producers of eggs will vote Nov. 3-28 to determine whether a nationwide research and promotion order should be issued for eggs, egg products, and spent fowl (nonproductive laying hens), the U.S. Department of Agriculture (USDA) announced last week. The Department also stated that marked ballots must be received in Washington, D.C., no later than Nov. 28.

Officials of USDA's Agricultural Marketing Service (AMS) said the referendum will be conducted by mail ballot. Eligible to vote are flock owners in all states except Hawaii and Alaska who had, between June 1 and Aug. 31, 1975, more than 3,000 laying hens producing eggs for commercial use, and who are engaged in the production of eggs at the of balloting. Ineligible are owners of flocks whose output is used primarily for hatching purposes.

The announcement, which was published in the Oct. 17 Federal Register, followed USDA's final decision on the provisions to be included in the order (press release USDA 2838-75) and on the rules to be used for the referendum (press release USDA 2964-75).

Connor Kennett, AMS Poultry Division director, said all known eligible voters will receive ballots and instructions by mail. Any producer not receiving a ballot by Nov. 3 may obtain one by contacting either a county office USDA's Agricultural Stabilization and Conservation Service, or from the Director, Poultry Division, AMS, USDA, Washington, D.C. 20250.

Safety seminars slated

The South Central Pennsylvania Chamber of Commerce Association and the regional Occupational Safety and Health Administration of the U.S. Department of Labor will cosponsor an all-day deminar in Hershey, PA on October 30.

BRUNING PAINT
"A Quality Paint For Every Purpose"
• Engine Sales & Service
• Lawn Mower Sharpening-Hydraulic Units.
JOHN Z. LAPP
Centerville Road
RD1, Gordonville, Pa. 17529

David H. Rhone, who heads the regional office of OSHA, said the seminar has been designed to acquaint both large and small busniess people with the basic elements of implementing a voluntary compliance program. "In addition," Rhone said, "we will cover the compliance policies, procdures and the rules and regulations of the OSHA program."

The conference which will be held at the Hershey Motor Lodge and Convention Center, is being cosponsored by the following chambers of commerce in the South Central Pennsylvania Chamber of Commerce Association:

Altoona Area Chamber of Commerce, Greater Carlisle Area Chamber of Commerce, Greater Chambersburg Chamber of Commerce, Gettysburg Area Chamber of Commerce, Hanover Area Chamber of Commerce, Greater Harrisburg Area Chamber of Commerce, Lancaster Area Manufacturers' Association and Lancaster Chamber of Commerce, Lebanon Valley Chamber of Commerce, Chamber of Commerce of Reading and Berks County, State College Area Chamber of Commerce, Williamsport-Lycoming Chamber of Commerce and the York Chamber of Commerce.

The seminar will be conducted by Rhone and members of the OSHA staff which includes compliance officers, industrial hygienist, safety experts and area directors.

The seminar begins at 10 a.m. and is scheduled to end at 3 p.m. Rhone said those wishing to attend should contact their respective chamber of commerce for reservations.

Von Humboldt award winners

WASHINGTON, - Oct. 17 - One of sicence's most prestigious honors, the Alexander von Humboldt Award, was conferred here last week on Dr. Theodor O. Diener, of USDA's Agricultural Research Service, and Dr. Joseph S. Semancik, plant pathologist with the University of California, Riverside.

This award is conferred on scientists whose research is deemed to represent the most outstanding contribution to agriculture during the past three to five years. In ceremonies at the Cosmos Club here, the two scientists each received a medallion, certificate and a check for $5,000.

Dr. Diener and Dr. Semancik were honored for their research on viroids, microscopic disease agents. Their research marks the second discovery in this century of a previously unknown type of disease-producing agent. This discovery could be the key to unlocking the mysteries that surround some of the most serious diseases of plants, animals and man.

The isolation and identification of the viroid can be compared to the discoveries of bacteria in the late 1800's and viruses in the first half of this century. The viroid is only one-fiftieth the size of the smallest known virus and consists solely of a short strand of ribonucleic acid. Despite its small size, the viroid is capable of multiplying in susceptible hosts and causing disease.

Dr. Diener discovered the viroid in research with potatoes. Dr. Semancik's work was with the agent causing the exocortis disease of citrus trees. Similar agents may be implicated in other crop and livestock diseases that now result in losses of millions of dollars annually. Research is being conducted to determine whether some hauman disease, including cnacer, may be associated with viroids.

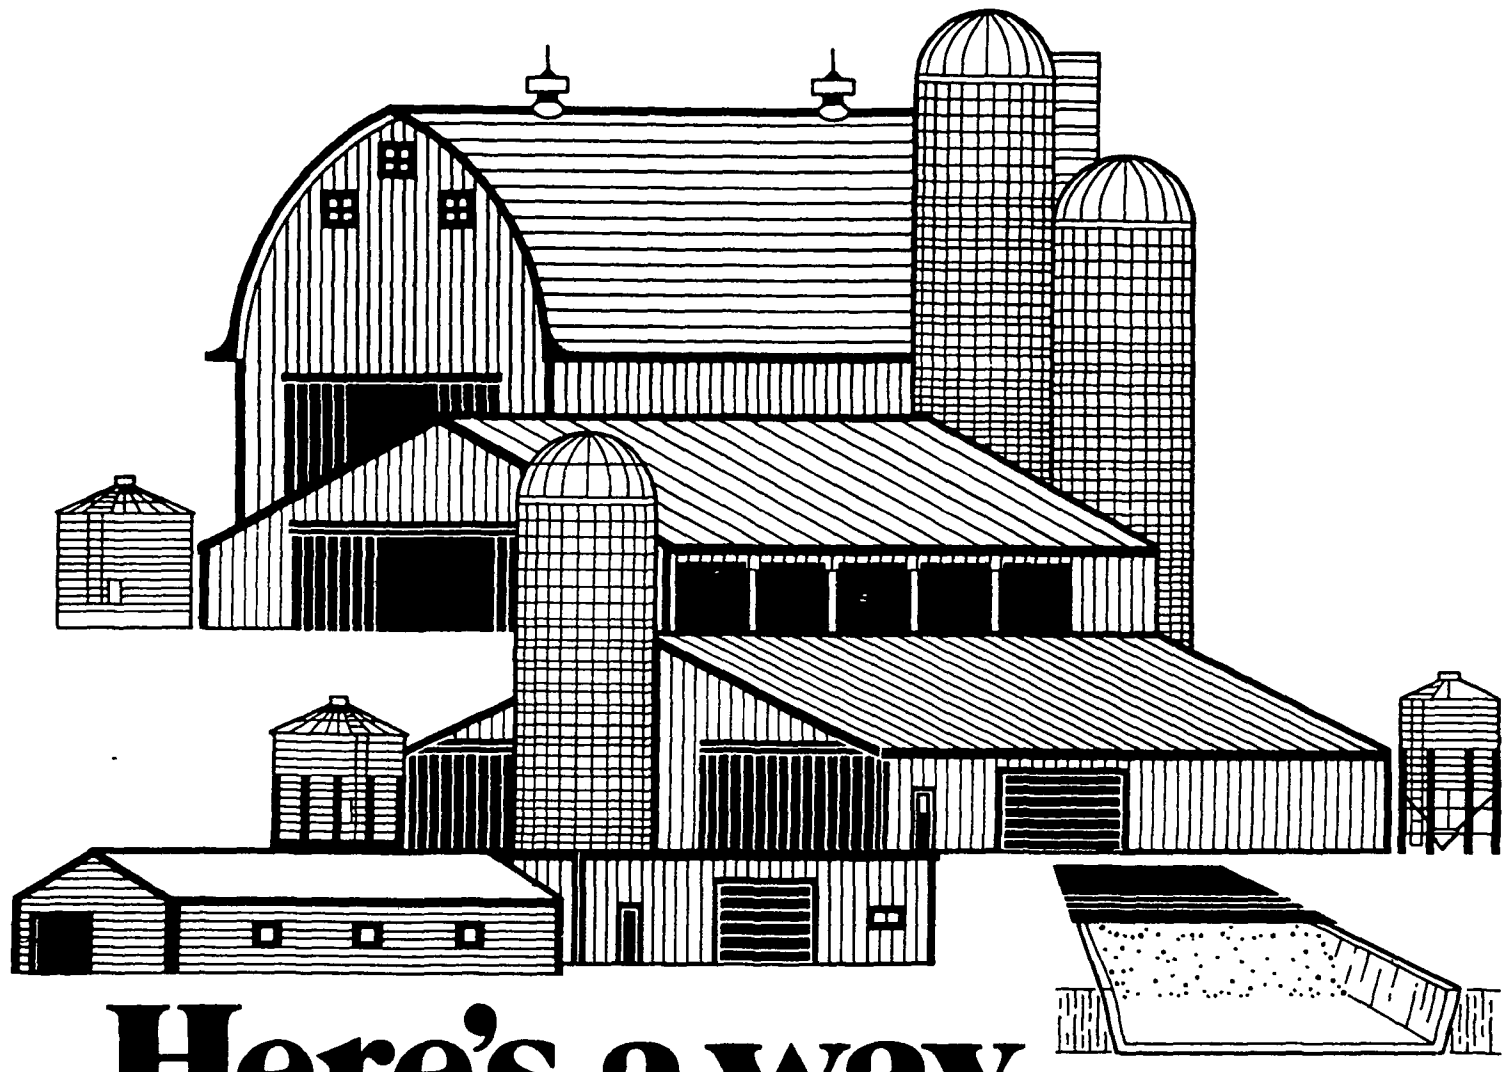
Discovery of the viroid suggests a new approach to the study of diseases thought to be caused by viruses, but for which no virus-like particles have been heretofore identified. This research also alerts scientists to the possibility that additional types of disease-causing agents may exist. Thus, much time should be saved in avoiding research seeking a viral agent.

Dr. Diener is a plant pathologist at the Plant Virology Laboratory of USDA's Agricultural Research Center, Beltsville, Md. He is the author of coauthor of more than 90 scientific publications.

The award conferred on Dr. Diener and Dr. Semancik is named for Alexander von Humboldt, who achieved international fame in the study of earth sciences and ecology. He was born in 1769 in Berlin, German, and died there in 1859. He explored more than 6,000 miles of Central and South America, collecting plant samples and conducting other research. Dr. Diener and Dr. Semancik are the first sicentists from the United States to receive the award.

Blueberry Road

If all the blueberries grown in America in one year could be spread out in a single layer, that layer would cover a four lane highway stretching from New York to Chicago



Here's a way to store wet corn most anywhere

Yes, right on your farm, ready for feeding without spoilage, heating or mold. In sheds, barns, regular silos, or metal bins. Without investing lots of capital in an airtight silo. Without a lot of expense.

Use the ChemStor way. Apply ChemStor® liquid preservative from an approved applicator right at your storage. Shell it, treat it, store it. To keep all year, if you need to! Wet corn that's palatable, tops in feed efficiency. And that keeps for weeks after rolling or grinding for feeding, so you save daily mixing.

The ChemStor way, you harvest corn early, with less field loss, treat and store as fast as you bring it in. At a cost usually lower than drying. See us now. Get all the facts on a better way to store wet corn.

CHESTER CO. DHIA MONTHLY REPORT

SEPTEMBER 1975

The top herd in the Chester DHIA program last month was Herman Stoltzfus' whose 51 registered and grade Holsteins produced an average of 1.94 pounds of butterfat per cow per day. Coming in close behind for second place was the registered Ayrshire herd at Ardrossan Farms. With 117.5 cows on test for the month, average daily butterfat production was at 1.91 pounds per cow.

Those herds with an average butterfat production of over 1.50 pounds per cow per day are included in the following report. Results for Robert Pepple, Elam Petersheim and Jefferson Yoder, are for August, rather than September, the Chester County Extension Service notes.

Jefferson Yoder had the first and second high individual records produced in 305 days on twice a day milkings. The leader was a registered Holstein with 22,611 pounds of milk, a 4.6 per cent test, and 1,037 pounds of butterfat to her credit. The second-place slot also went to a registered Holstein for her performance — 22,501 pounds of milk, a 4.1 per cent test, and 933 pounds of butterfat.

Lancaster grange elects officers

Lancaster County Pomona Grange 71 held their fall meeting at White Horse Fire Hall Saturday, Oct. 18, as guests of Salisbury Grange. Pomona Master Jesse Wood presided at the business session when the Grange adopted this resolution:

"WHEREAS, Agriculture is in the need for security from natural disasters.

WHEREAS, Most of the state's farmers are not given the opportunity to participate in the Federal Crop Insurance program. Therefore be it

RESOLVED, That we seek expansion of this insurance facility to more counties in the state.

Election of officers for a two year term took place when Jesse Wood was reelected Master. Other officers elected and to be installed in January are: Overseer - Harry Baker; Lecturer - Mrs. J. Stanley Stauffer Jr.; Steward - Mrs. Clifford Holloway III; Chaplain - Loran Brinton; Treasurer - Charles McSparran; Secretary - Mrs. Ira Welk; Gatekeeper - Alfred Wanner Jr.; Ceres - Miss Peggy Galbreath; Pomona - Miss Helen Wanner; Flora - Mrs. Richard Holloway; Executive committee member for a two year period - Richard Maule and for a three year period - Ralph Wanner; Finance Committee member for a two year period - Melvin C. Boyce and for a three year period Clifford Holloway Jr.; and pianist - Glenn Hough,

Reports of officers, the Women's Activities committee and the committee for entering the Penna. State Grange Oct. 27-30 in Lancaster were given: The business sessions will be held in the mornings and afternoons at the Fulton Theater. J. Luther Snyder, Master of the Penna. State Grange, will conduct the business sessions when approximately 150 resolutions will be acted upon and Grange policy adopted. There will be election and installation of members to the Executive and Finance committees.

Evening meetings will be held at McCaskey High School. Talent contests will be featured on the program for Monday and Tuesday at 7:30 p.m. to which the public may attend. Sixth degree will be conferred Wednesday at 8 p.m. preceded by an address by John W. Scott, Master of the National Grange.

The tour committee, Elmer Funk of Montgomery Co. chairman, has planned four tours for Wednesday afternoon. The tours will leave the Fulton Theater at the close of the morning session. Tour number 1 is an agricultural tour taking in the farms of Noah Kreider and Sons, Harold Kreider Mum Farm, and Miles Fry and Son. Tour 2 is a commercial tour to New Holland to visit Weaver Poultry Processing Plant and the New Holland Machine Co. Tour 3, the historical tour, will visit the Hans Herr House, Wheatland, Landis Valley Farm Museum and the Wax Museum. Tour 4 is a local colour tour, touring the Amish country.

Wednesday afternoon will also feature the youth ritual and demonstration contests, Masters meeting, conferral of the Junior Grange degree and the fifth (Pomona) degree. The youth banquet will be held from 5 to 7 p.m. and youth party at 9 p.m. at McCaskey High School. There will also be other groups having banquets during the week, special speakers and the Lecturer, Women's Activities, Junior Grange and youth exhibits will be at Lancaster Hilton Inn.

Pomona Lecturer, Mrs. Jesse Wood read a poem "And God Said" and conducted a game with Mrs. Joseph Hess the winner.

The next meeting will be an evening dinner meetingJanuary 17 when Thomas Galbreath will install officers and a memorial service held.

Apple sales need boost

HARRISBURG — The Pennsylvania Agriculture Department is attempting to boost sales for commonwealth apple growers with letters to chain stores to buy the Pennsylvania grown varieties.

Agriculture Secretary Jim McHale said Pennsylvania, like the other major apple producing states in the east, is having a difficult time unloading its apple crop at prices worthwhile for producers.

The National Association of State Departments of Agriculture (NASDA), McHale pointed out, recently issued an appeal to apple processors to "reassess their producers prices . . ."

In a letter to the Safeway Stores Produce Buyer Department in Landover, Md., signed by McHale and agriculture commissioners and secretaries from Maryland, New Jersey, Virginia and West Virginia, NASDA urged the chain store "to purchase locally produced apples for your retail outlets in the eastern part of the country. It would certainly seem to us that such a buying practice would be in the best interest of the communities you serve and your consumers."

In Pennsylvania, McHale noted, the department's Bureau of Markets is augmenting its usual apple promotion program with an appeal to processors to buy locally.

Processors account for at least 60 percent of the market for Pennsylvania apple growers.

The commercial apple crop this year in Pennsylvania is forecast at 550 million pounds, up 15 percent from last year. This large crop and the fact that processors have carried over large inventories from last year have created bad market problems for apple growers.

According to the department's Bureau of Markets, prices for apples have been low with some varieties selling in the $6-a-bushel range.

"Our apple growers can only get a break if the processing market opens up," said McHale. "This is why we are now taking special care to urge chain store buyers to purchase Pennsylvania grown apples."

Poultrymen gathe'round

The Lancaster County Poultry Association will hold its annual Banquet on November 6, 1975 at 6:30 p.m. at Historic Strasburg Restaurant.

The speaker for the evening will be Howard Helmer, "The Omelet King".

A brief business meeting will include the election of four directors. There will be a drawing for door prizes for all 1976 members. Membership fee of $5 can be paid the night of the Banquet.

A family style meal will be served; tickets are available from the directors at $6.50 per ticket.

Blood tested free

The November schedule of free blood pressure clinics sponsored by the American Heart Association, Lancaster Pennsylvania Chapter was announced recently. These free blood pressure testings are provided by Heart Fund dollars and will be provided at the following locations and times:

Lung Association 630 Janet Avenue, Lancaster, from 10 a m. to 12 noon, and 1 p.m. to 5 p.m on November 4, 1975.

Sloan's Pharmacy, 61 E. Main Street, Mt. Joy, on Monday, Tuesday, and Wednesday from 2 p.m. to 4 p.m.

American Heart Association, Lancaster Pennsylvania Chapter, 246 W. Orange St., Lancaster, every Friday from 2 p.m. to 4 p.m.

Pharmacy Labs, 335 W. King St., Lancaster every Monday through Friday, from 8:30 a.m. to 4:30 p.m.

McElroy's Pharmacy, 100 E. Main St. Lititz, every Wednesday from 1 p.m. to 4 p.m. and every Friday evening from 7 p.m. to 8:30 p.m.

Lancaster Community Health Center, 545 Pershing Avenue, Lancaster, every Monday from 1 p.m. to 4 p.m. and every third Saturday from 1 p m. to 4 p.m.

All testing at these centers are Free of charge and are supported by your Heart Fund dollars

Lebanon County makes flood provisions

The Lebanon County ASC Committee has implemented the Emergency Conservation Measures Program to defray costs to farmers for restoring farm land damage by hurricane, Eloise. Government cost-share rates are 80 percent of cost for replacing fences, removing debris from farmland, grading, shaping, releveling of land, and restoring sod waterways, diversions, terraces, ponds and dams. Please contact the Lebanon County ASCS Office at 1730 North Highway 72, Lebanon, Pa. 17042 or call 273-9321 if you have experienced damages because of the storm.

Some corn in Lebanon County has received considerable damage because of high water. Farmers planning to harvest this corn for silage and who wish to file for low yield payment should call before it is harvested so that an appraisal can be made in the field. Corn that is harvested as shelled corn or picked for ear corn should be reported within 15 days after it is harvested to measure the acutal yield for low yield payment.

Groff receives honor for high-yielding corn

James R. Groff of Lancaster has posted an approximate yield of 174.84 bushels per acre of No. 2 corn in the DeKalb Yieldmasters Club, according to a preliminary yield check reported to the Lancaster Farmer by area DeKalb District Service Representative Ed Wilson.

Groff's entry was mechanically harvested and verified by an impartial third party. The yield came from a field of XL64A.

Groff planted the field on April 30 in 30 inch rows and had an estimated harvest stand of 24,500 plants.

His fertilizer program included 130 lbs. of nitrogen, 110 lbs. of phosphate and 115 lbs. of potash. Weeds were controlled with Lasso & Atrazine.

The purpose of the Yieldmasters Club is to promote an exchange of ideas, in an atmosphere of friendly competition, among the nation's leading corn farmers. Each entrant in the program provides detailed information on his own corn growing practices. These data are organized by program officials and a composite of results is tabulated. Through the sharing of this information, the program attempts to encourage practices which will help farmers gain the maximum amount of net profit from each acre of corn.

At a winter meeting Groff will receive a plaque in recognition of his yield.

Kuhfuss hits export policies

SAGINAW, ... The key role that record 1975 U.S. crops can play in the nation's economic recovery and favorable balance of trade is being jeopardized by the Ford Administration's interference in agricultural export markets, William J. Kuhfuss, president of the American Farm Bureau Federation, said here last week. He addressed the annual meeting of the Saginaw County Farm Bureau.

"American agriculture through its unequalled productivity and its contribution to a favorable blalnce of trade, is the one sector of the economy that has made a major contribution in combatting inflation and in giving sorely needed impetus to the general economic recovery," the national farm leader said.

Kuhfuss pointed out U.S. farm exports for the fiscal year ending June 30, 1975, reached $21.6 billion and resulted in a positive trade balance of $12 billion in our agricultural trade. This pushed the U.S. overall trade balance into the black by $2.2 billion.

"Our record farm exports have helped to pay for the soaring costs of oil imports and also strengthened the vaule of the U.S. dollar, but we are faced with a decline in these exports because of the delays in sales to the Soviet Union and Eastern Europe by the on again, off again export policy of the Administration," Kuhfuss said.

The Federation president pointed out that even if restrictions are removed this month on Soviet sales, (they were) much damage has already been done to the image of the United States as a reilable supplier in world markets.

"The Soviet Union has purchased 500,000 bushels of soybeans from Brazil and last week bought 500,000 long tons of wheat, oats and barley from Canada.

"The most unfortunate aspect of the embargo on sales to the Soviet Union and Poland is that the action was totally unnecessary on the basis of supply estimates as early as a month ago. Even with the October crop report which showed the largest corn crop on record, the second largest soybean crop, and record wheat and rice crops, the Administration refused to lift restrictions on Soviet sales.

"U. S Department of Agriculture officals admit that the record corn and wheat crops show that the United States can take care of domestic needs, increase its exports and still have an increase in the carryover at the end of the crop year.

"Why then is the government playing a cat and mouse game with the nation's vital export market? The claim of the AFL-CIO that sales to the Soviet Union would increase consumer prices is a phony as the union's stated interest in protecting U.S. consumers. The unions pressured the Administration into its moratorium action in order to secure higher shipping rates, higher maritime subsidies and an increase in the amount of grain loaded in American ships. The State Department used the excuse of union pressure to use U.S. farmers' grain as a political pawn in a diplomatic chess game to gain concessions from the Soviet Union unrelated to grain agreements.

"The orchestrated campaign to make Soviet sales the scapegoat for increased food costs and other economic ills has provided a handy excuse for those Congressmen and union leaders seeking to divert public attention from excessive government spending - the root cause of inflation. The myth of the disastrous effect of the Soviet sale is exploded by the fact that sales to Russia to date amount to only six percent of the wheat crop, and three percent of the corn crop."

The farm leader also expressed concern over the so-called "agreement" negotiated with the Soviet Union to "regularize" future sales to Russia under a bilateral agreement.

"In view of the success the United States has enjoyed in the world export market through use of the market system in moving our grains, why does the Administration seek to copy the failures of government-to-government trading as experienced by Great Britian, and other nations.

"Consumers, whether they know it or not, have considerable to lose if the U.S. shifts a surplus producing nation in grain crops. If maxiumum U.S. farm production, with its accompanying efficiencies, is to be maintained, there must be export outlets for its output. We traditionally export two-thirds of our wheat, one-fourth of our corn, and one-half of our soybeans. In the absence of world market outlets, the only alternative for the nation's farmers is to curtail output.This means less efficient production, higher food costs, a lower standard of living and a loss of jobs for those workers involved in all phases of U.S. farm exports.

"As far as farmers are concerned, there is an urgent need for the Congress and the executive branch to determine a long range export policy that is in the best interests of all segements of the national economy and then stick to it. The recent experience of farmers, who were urged to go all out in production with the promise of unfettered access to world markets only to have the rug pulled out from under them at harvest time, has resulted in a growing distrust of government policy on the part of farmers," Kuhfuss said.

Commenting on a current and erroneous criticism by some that the United States is delivering its food commoditites mainly to those countries that can afford to purchase them and thus denying food aid to the poorer nations, Kuhfuss pointed out: "In spite of increased commercial export sales and tighter supplies, the United States provided $1.6 billion for Public Law 480, our principal food aid vehicle, in fiscal 1975. This was enough to finance approximately 5.5 million tons of commoditites, mostly wheat and rice.

"U.S. export sales also are necessary to maintain a large and efficient production plant. Such a productive capacity is necessary not only to meet our domestic needs and commercial exports sales, but to make continued food aid possible.

"We should also remember that if it were not for the 80 million tons of farm commoditites being sold abroad on commercial terms in the current fiscal year, these buyers would face the threat of food shortages," Kuhfuss said.

From Local Ag Teachers:

Thoughts in Passing

Remember Safety when Harvesting
By Ronald Althoff
Ag Instructor
Solanco High School

Fall has now officially arrived. The leaves are turning to their brilliant shades of color and the corn is ripening. Pumpkins are appearing at roadside stands and witches and globbins are popping out from store windows. Farmers are taking to the fields to harvest that last cutting of alfalfa, or get the corn finished so they can enjoy the first day of the hunting season.

Yes, I think you will agree that fall is indeed a lovely and busy season of the year. Don't let the hustle and bustle get to you this year; remember SAFETY. We want'all' of you to be able to enjoy the coming seasons as well.

Carelessness is a contributing factor in a majority of all accidents involving corn pickers and combines.

What causes those who operate these machines to be careless? I have several opinions on the subject. You are entitled to agree or disagree with me.

1. Haste - Everyone gets in a hurry to get finished. We have had some wet weather now that has slowed down the harvest. Don't be too hasty - slow down, there will be a tomorrow. Stop the machine, a loaded wagon has a great deal of energy once it gets started in motion down a hill.

2. Boredom - Boredom dulls our senses. Operating a machine all day becomes monotonous and often causes drowsiness. Stay alert! Take a break and get something to eat or drink. Just walk around and wake-up.

3. Daydreaming - Thinking about the cow that might be calving in the pasture, or the tractor that needs repaired. Think about what you are doing.

Carelessness is only one factor for many accidents, but I think this is the factor each of us can control if we slow down and stay alert. Let's all enjoy this beautiful season and not have it marked by tragedy.

What's New . . .

Motors List

A new six page Stock List is offered by Leeson Electric Corporation of Grafton, Wisconsin. The Stock List provides specifications for the complete line of stock fractional and integral horsepower motors available from Leeson.

Both open drip-proof and totally enclosed motors are included, in rigid, resilient and "C" face mountings. Sizes available range from the 48 through the 215T frame, in horsepower ratings from ¼ to 10. "Hard to find" motors, such as 575 volt designs and 50 hertz, single phase designs, are also stocked. Brake motors, farm duty motors and accessories are covered in special sections. Sales office locations and ordering information are also provided.

Leeson Electric is a full-line manufacturer of industrical purpose electric motors. For a copy of the current Stock List, write Leeson Electric Corporation, Box 241, Grafton, Wisconsin 53024.

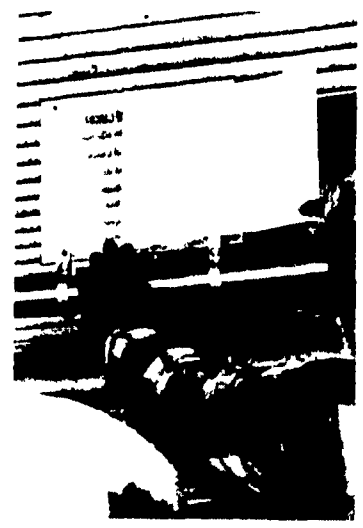
What's New . . .

Clear Card Holder

Dairymen can see at a glance each cow's production history, daily feed ration, and other operating information with the new Chartguard identification card holder from Raytec Manufacturing, Ephrata, Pennsylvania.



Mounted above each cow's stall, Chartguard gives instant visibility of individual records. Helps make it easy to quickly identify livestock. Permanent facts of milk production, name, pedigree and other information can be written on the card. Non-permanent data such as feed ration, breeding and drying off time can be recorded with special marking pencil on the acrylic holder and wiped clean when deisred.

Chartguard is constructed of durable non-yellowing acrylic. Resists soiling and cracking. Easily mounts on pipe or ceiling.

For more information wrtie Raytec Manufacturing, RD3, Ephrata, Pennsylvania 17522.

Book on Weeds

The Agri-fieldman Weed Control Manual, published for 12 years as part of the February issue of Agri-fieldman magazine, will be published this December as a separate volume devoted exclusively to the topic ot weed control - pest weeds, herbicides available, and a full range of crops and applications.

The new, separate publication comes as a response on the part of Meister Publishing Company, publisher of five specialized agricultural magazines and two c'her annual publications, to the marked increase in herbicide use in recent years and the added complexity of regulations regarding herbicide application.

USDA figures in the 1974 Handbook of Agricultural Charts, for instance, document that herbicide use more than doubled between the period of 1964 and 1971.

"Agricultural consultants and growers are anxious to begin planning weed control programs earlier in the year. Our new December publication date will now make this possible. This 1976 edition, listing over 200 herbicides, will have four-color illustrations of the most common weeds to facilitate weed identification and a new, heavy-duty cover to withstand the frequent use the volume will receive," Editor Gordon Berg announced.

The Crop Index section of the volume contains 79 different listings including field corn, soybeans, cotton, wheat, grain sorghum, alfalfa, various small grains, rice, fruits, vegetables, and other leading crops - all the way to mug beans and macadamia nuts.

The Manual also includes a Weed Index and Herbicide Index as well as a Directory of Manufacturers.

Individual copies are avilable at $6 per copy from Agri-fieldman, 37841 Euclid Avenue, Willoughby, Ohio 44094. Bulk copies are available and discount order prices will be quoted upon request.

Tax office offers handouts

Tax benefits are available to many Pennsylvania taxpayers who suffered property losses as a result of flooding which occured Friday, September 26, 1975, according to David L. Kantner, Schuylkill County Extension Agent.

Special provisions of the tax law enable taxpayers located in many Pennsylvania counties, declared disaster areas by President Gerald Ford on September 27, 1975, to deduct disaster-related casualty losses on either the current year's return or that of the preceding year by filing an amended return, Form 1040X, according to James T. Rideoutte, IRS Philadelphia District Director.

The counties are: Adams, Berks, Bradford, Centre, Clinton, Cloumbia, Cumberland, Dauphin, Franklin, Fulton, Juniata, Lackawana, Lancaster, Lebanon, and Luzerne.

Also, Lycoming, Mifflin, Montour, Northumberland, Perry, Potter, Schuylkill, Snyder, Sullivan, Susquehanna, Tioga, Union, Wayne, Wyoming, and York.

Rideoutte said the law covers losses of business property, as well as personal property, and extends to taxpayers who use either fiscal-year or caldender-year basis to file their tax return. Nonbusiness losses are limited to the amount over $100 for each casualty, he added.

Rideoutte suggested that taxpayers take the following steps before amending their tax returns: photograph all damaged property, take an inventory of all damaged and loss property, attempt to locate receipts for the property and obtain, if possible, independent property appraisals. This will greatly facilitate casualty loss processing.

Taxpayers who need help in preparing returns or in making a claim for refund can visit a disaster assistance office or call the IRS taxpayers service number in Harrisburg at 783-8700 or in other areas - 800-462-4000 (Toll Free).

The IRS District Office is located at 600 Arch Street, Philadelphia, Pennsylvania, Telephone: 215-597-4245.

(Transportation Provided)

WHY DOES PURINA USE THE DAIRY NUTRITIONAL WORKSHEET TO CALCULATE THE AMOUNT OF DAIRY RATION TO FEED?

Because the key to increased profits and milk production is the formulating of the correct nutritive ration to balance the forages and grain on your farm.

★★★
